

MONOLITH

INTERSTELLAR SCIENCE-FICTION ADVENTURE

M O N O L I T H

**“THOSE WHO PLAY WITH THE DEVIL’S TOYS
WILL BE BROUGHT BY DEGREES TO WIELD HIS SWORD.”**

—R. BUCKMINSTER FULLER

INTRO

Monolith is a Science fiction adventure game for one Game Master (GM) and at least one other player. Players act as daring adventurers exploring a vast & mysterious galaxy filled with weird aliens, lost worlds, and ruthless factions.

NOTES

- › Monolith is a sci-fi / science fantasy hack of Cairn, by Yochai Gal.
- › Full credits at the back.
- › Monolith was written by Adam Hensley and its text is licensed under CC-BY-SA 4.0
- › Cover art created by Jacob Marks.
- › This version of the game is designed to be light on ink, low art, and compactly designed for easier home printing.
- › Minor references to violence, drugs, alcohol, and sex.

INSPIRATIONS

- › Star Wars
- › 2001: A Space Odyssey
- › The Expanse
- › Farscape
- › Mass Effect
- › Cowboy Bebop
- › Futurama
- › Firefly
- › Guardians of the Galaxy
- › Classic Traveler
- › Stars Without Number

PRINCIPLES

CLASSLESS

A character's role or skills are not limited by a single class. Instead, the equipment they carry and their experiences defines their specialty. They have a background, which tells you a bit about their experiences before becoming an adventurer, but it doesn't define who they can become.

MODULARITY

All rules are optional. Everything is designed to be modular. You can pull whole parts out, slot in optional rules, and add your own home brew content.

NARRATIVE GROWTH

Characters are mostly changed through in-world actions and consequences. Players may acquire new skills and abilities by surviving dangerous events or overcoming obstacles. Dangerous and valuable technology and artifacts will often change a character. Characters also have the incentive of acquiring experience points via credits recovered from hunting rare objects or completing dangerous jobs.

MINIMAL IMPLIED SETTING

Some setting elements are implied, such as alien species, psionics and space magic, starships, cybernetics, etc. Most of the setting was kept intentionally vague so you can customize your galaxy and its contents. If you don't want aliens, psionics, or anything else, they can be re-flavored or removed.

HACKABLE

Many of the effects of psionics, astromancy, talents, experimental tech, artifacts, and various augmentations can be shifted around. Magic effects can be items instead. A piece of tech could be an ability or talent instead. There's a lot of overlap, and that's intentional. Hack and re-flavor as needed.

COMPATIBILITY

This game is designed to be compatible with other pre-written adventures (especially sci-fi) with minimal and flexible conversion.

SPRAWLING ADVENTURE

While single sessions are a perfectly acceptable ways to play, this game was designed with several sessions to campaign length play in mind. Characters may start out with a few more advantages than in other games, but that's by design. The universe is still deadly enough to impose serious challenges when needed.

DANGER & CONSEQUENCES

Characters may be powerful, but they are also vulnerable to danger. Death is always around the corner, but it is never random or without warning. Sometimes there are consequences other than death that can change who you are, or even alter the galaxy itself.

FICTION FIRST

Dice do not always reflect an obstacle's difficulty or its outcome. Instead, success and failure are arbitrated by the GM in dialogue with the players, based on in-world elements. Always rule in favor of fun if everyone is in agreement.

PLAYER CHOICE

Players should always understand the reasons behind the choices they've made, and information about potential risks. Give players a lot of information.

SHARED OBJECTIVES

Players should trust one another to engage with the shared setting, character goals, and party challenges. Therefore, the party is typically working together towards a common goal, as a team.

GROWTH & PROGRESSION

EXPERIENCE GROWTH

Characters will gain XP and level up as a measure of general toughness. They gain heartiness and become more capable in a general, non-specific sense.

NARRATIVE GROWTH

This is the kind of progression and change that happens from in-world events via gameplay. Narrative growth comes from finding rare artifacts, evolving psionic abilities, augmenting yourself with the latest black market cyberware, NPC connections, and even suffering losses. All of these contribute to a character changing narratively.

APPLYING GROWTH

This is where the role of the GM really comes into play. Some backgrounds provide implied fiction to aid both the player as they navigate who their character might be, and guide the GM as they adjudicate narrative growth based on player action.

If a PC rolls “Psionic” as their background, they can lean into that element of their character or completely disregard it. Find opportunities for the them to engage in the aspects of their character they find most interesting. For example, reward the Psionic with things like awakening new powers from stressful events, learning from fellow psionics, and seeding growth opportunities in your setting for them to discover— like items, opportunities to train, and other ways to help them grow and change based on their choices in the fictional world.

If players forego their background in lieu of wanting to become someone new, support that in the same way.

Let the universe change the characters.

CHARACTER CREATION

ABILITY SCORES

Roll **3D6** for each ability score in order. The player may swap any two of the results.

- › **Strength (STR)**
Power, toughness, grit, & stamina.
- › **Dexterity (DEX)**
Quickness, precision, agility, & technological aptitude.
- › **Willpower (WIL)**
Confidence, force of personality, mental fortitude, & affinity for the weird.

BACKGROUND

- › Roll **1D12** and consult the corresponding background to see what your life has been like up to this point.
- › Next, roll on all the tables listed under that background.
- › All backgrounds will have three tables, one corresponding to HP, and two other tables to flesh out their history.

HIT PROTECTION (HP)

Rolling **1D6** determines your character's starting Hit Protection (HP), which reflects their ability to avoid damage in combat. HP does not indicate a character's health or fortitude; nor do they lose it for very long (see Healing). They grow more grizzled over their experiences. If an attack takes a PC's HP exactly to 0, the player must roll on the scars table.

FINISHING TOUCHES

Roll on any the additional tables (if you want) in the finishing touches section (pg. 32) for extra traits and character qualities.

SHARED DEBT

Roll on the shared debt table (pg. 34) for the group's shared debt. This will help facilitate urgency for the players by prompting them to search out jobs and make money, as well as provide the GM with world building and story hooks. Optional but highly suggested.

VICES

With your Ability Scores in place, make a WIL save. If you fail, roll on the vices table to start with a vice. Consequently, characters may develop vices through the fiction of play. See the triggers listed in vices to learn more about this. Optional but highly suggested.

STARTING GEAR

All PCs begin with:

- › Three days of rations (one slot)
- › Cheap Data-Comm (one slot): Data-comms can communicate locally (planet wide) and access local data networks. Higher quality data-comms might have additional perks or functionality.
- › Glo-torch (one slot)
- › 3D6 Credits (C)

GEAR PACKS

(Variant Character Creation Option)

If players prefer to create a character without a background, reference the chart on pages 38-39. Players will roll their stats as normal, roll 1d6 HP, and reference the chart according to their highest stat and their HP. This will give them a starting package that may include weapons, powers, equipment, and other character features.

BACKGROUNDS

BACKGROUND DETAILS

You might have done other things in the past, but your background represents your most recent or most significant experience.

Some elements from your past might still be relevant to who your character is or could become, but their past doesn't define them. Backgrounds will also imply some specialized knowledge, along with other details based on the dossier tables.

- 01. MERCENARY
- 02. HUMAN EXPERIMENT
- 03. ENGINEER
- 04. SMUGGLER
- 05. PILOT
- 06. MACHINE
- 07. UNDERWORLD
- 08. PSIONIC
- 09. SCIENTIST
- 10. SOLDIER
- 11. STAR-TOUCHED
- 12. BOUNTY HUNTER

MORE TO COME...

01 — MERCENARY

PROFILE

Mercenary crews are guns for hire. They have experience in combat, insider knowledge of the violence business, and are a little rougher around the edges than others. You and your old crew fought for the highest bidder, not for any sort of ideology. Unless that ideology was lots of creds.

STARTING GEAR

- › Old Crew Emblem
- › Combat Knife (D6) or 2 Flash Grenades
- › Cigar

//:GENERATING SUBJECT DOSSIER...

D6 Signature Weapon	
1 HP	Ifriti-9000 “Hell Spitter” (D10 Blast, Thermal, Bulky) and 2 tanks of fuel (spec-ammo) A deluxe model flamethrower that sprays super-thermal plasma that can burn through metal.
2 HP	Folding Vibro-Shank (D6, Deadly, Shock, concealable) A five-inch blade that does absolutely devastating damage. Folds up for concealing. Very-illegal.
3 HP	Supercharged Carbine Repeater (D8 Thermal and d6 Cryo, bulky) Custom modded to switch between thermal or sub-zero energy rounds. Switching takes 1 turn.
4 HP	Jade-Iron Machete (D8, Deadly) 3 feet of marbled green metal with a wicked cutting edge. Expert craftsmanship and quite valuable.
5 HP	“Trusty” (D6 Blaster) & “Rusty” (D6 Blaster, Cheap) These two guns have been with you through thick & thin.
6 HP	“Rusty” (D6 Blaster, Cheap) You used to have two but lost the good one...

D6	Old Crew Specialty
1	Para-Military: Private sector military for hire. You were, and probably still are, an absolute professional. Take holo-binocs and a claymore.
2	Seedy Jobs: Hired muscle contracted through criminal syndicates, you are familiar with the less savory parts of the galaxy. Take a grimy outfit, a pack of smokes, & 6d12 worth of underworld trade goods.
3	Ghost Unit: Your crew specialized in delicate matters that needed doing discreetly and without a trace. Take plasti-steel armor (Armor 1, bulky) and a gas mask.
4	Hit Squad: Assassinations were your bread & butter. Take a thermal detonator, a dark outfit, and an infrared visor helm (Armor 1, heat vision)
5	Corp-Sec: Private megacorporate security for a major faction. Generate a faction and NPC and determine what type of business. Take the talent "Human Shield".
6	Deep Cover: Specialists in infiltration as double agents for espionage and intel gathering. Take an auto-lock slicer, drone cam, and fake ID.

D6	What Happened?
1	Last Man Standing: Something bad happened and everyone turned on each other. It was a bloodbath and you were the last man standing...at least you think.
2	Betrayal: Were you the leader, or were you a betrayer? Or was the whole crew betrayed by someone - inside or out? Either way, the crew broke up and you have to make your own way.
3	Things Just Change...: Or maybe you changed. Either way, you decided you didn't want to do what they did anymore, and broke off on your own.
4	Splintered: The group splintered, maybe from a disagreement in leadership, or infighting, and splinter groups broke off.
5	Kicked Out: Whether it was from breaking the rules, or not seeing eye-to-eye with the brass, you were exiled from your crew on bad terms.
6	Left Behind: Things went sideways on your last mission and you got left behind mission, considered MIA or dead. Maybe it's time for a fresh start.

02 — HUMAN EXPERIMENT

PROFILE

You have been the subject of unethical and experimental scientific tinkering. There were some side effects. You recently managed to escape.

STARTING GEAR

- › Cloak (Hooded)
- › Flashlight
- › Tattoo (Serial Number or Bar Code)

//:GENERATING SUBJECT DOSSIER...

D6 Side-Effects	
1 HP	Exothermic Lungs: Exhale a superheated spray of plasma (D10 blast, thermal). Costs 1 fatigue
2 HP	Magnetism: Manipulate metal objects up to 100 lbs with your mind. Costs 1 fatigue.
3 HP	Ghost Skin: Willingly phase through solid objects up to 3 feet thick. Costs 1 fatigue.
4 HP	Elasticity: Your arms and hands can stretch and change form up to 20 sq feet or 60 feet in length.
5 HP	Biomimicry: Change or alter your face and skin once a day.
6 HP	Ultra-Conductive: You can discharge, locally disrupting all nearby computers and circuitry once a day. Immune to electricity and EMP damage.

D6	Type of Experiment
1	Grown in a Tube: You are the product of scientific brilliance. You've only seen the outside world while floating inside a vat of life-sustaining fluid.
2	Brain Stress: They hooked your brain up with wires and pushed your mind to the limits. You know one random Psionic power.
3	Nanobot Infusion: Some type of prototype serum was injected into your bloodstream. Your body can naturally heal 1D4 STR damage a day.
4	Gene-Splicing: Bio-Engineering via illegal methods made your body more hardy and adaptable. You naturally have 1 armor.
5	Ghost-Shell: You are a recently re-animated or unwilling consciousness implanted into a synthetic body. You know one random Astromancy from your previous life. Your memory is slowly returning in pieces...
6	6 Billion Credit Person: You were a pet project of some unknown billionaire. They were attempting to create a perfect specimen. The project was considered a partial failure. Increase one Ability Score to 16.

D6	How Did You Escape?
1	Violently, by turning your powers on your captors. Take a bloody scalpel (D6)
2	Furtively, you somehow managed to sneak out in the dead of night. Take stolen records worth 4d8 credits on the black market and notes on how to find them.
3	Benevolently, an unknown figure unlocked your restraints while nobody was there. When you woke up, your escape was wide open. Take a mysterious business card.
4	Inexplicably, incomprehensible quantum displacement shifted you somewhere completely random. Take a random weapon (Roll 1D4). 1-2: small melee, 3: stun gun, 4: junky blaster.
5	Compliantly: You didn't need to escape, the experiment suddenly ended and you were released in the middle of nowhere, with no way of knowing who had experimented on you. Your account now has 2,000 credits as payment.
6	Cargo Mix-up: You were being shipped somewhere and the manifests got mixed up. Someone found you and let you go. The original experimenter is still looking for you. Take 1D6 random drugs or contraband items.

PROFILE

You’ve built a career around being handy. You’re skilled at repairing and maintaining mechanical structures and devices.

STARTING GEAR

- › Crowbar (D6)
- › Duct Tape
- › Grease-stained work clothes

//:GENERATING SUBJECT DOSSIER...

D6 Pet Project

- 1 HP

Dimension De-stabilizer: Tech belt that allows the wearer to slip in and out of reality. You cannot interact with anything in this reality but are still visible.
- 2 HP

Division Multiplier: Harness that when activated splits you into two smaller versions of yourself. HP & Ability Scores are halved. Inventory exists in a quantum state; items used by one version are inaccessible to the other. Lasts 1 minute. Causes 1 fatigue.
- 3 HP

Molecular Shield Generator: (+1 armor, 3 bonus HP a day) Swarm of fly-sized nanobots orbit you, occasionally running scans on your biological makeup, providing you with customized shielding and protection. Bonus HP takes a day to recharge.
- 4 HP

Anti-Grav Boots: Activate to reduce your fall speed at the last second and land safely. Recharge via 100 credit worth of common battery parts in 1d6 hours.
- 5 HP

Catherine: An A.I. chip you can implant into any basic device. Currently installed in your personal comm unit. Catherine is very polite. Will warn you of any imminent danger you might not notice. May run advanced diagnostics.
- 6 HP

Spider-Wasp Drone: A spider-sized drone that can quietly fly, crawl on most surfaces, and transmit video footage up to 200ft.

D6	Technical Expertise
1	Cyberware: Take Smart-Eye implants (Eye Socket.) 10x zoom, recording & playback.
2	Starships: You can fix any part of a ship, but it takes 2D12 hours.
3	Weapons: Take a Mass Untangler (D8, illegal, critical damage instantly disintegrates organics if they fail a STR save)
4	Security Systems: You can get through manually locked doors and shut down surveillance with minimal effort and tools.
5	Robotics: Take a chest harness (1 slot) with a robotic arm on it that can carry a weapon and perform similar actions to your own arms. Only works with your DNA signature.
6	Software: You have increased effect and reduced failure when performing tasks related to computers, hacking, and using software or user-interfaces.

D6	Savant Specialty
1	Gearhead: You can spend 1 turn (10 min) tinkering with most fist-sized objects you're familiar with to get them at least partially working.
2	0110101001: You're oddly persuasive to A.I. and computing systems. +1 to reaction roll results with machines and synthetics.
3	MacGyver: You can fix almost anything with duct tape, holding anything broken together as if undamaged for 1D6 hours. Also, generally handier than almost anyone else.
4	Fried Wires: You've tinkered with enough electronic components that shock damage and anything electric only damages your HP, completely ineffective at damaging your Ability Scores.
5	Jack of All Trades: You're pretty good at everything. Once a day you can take one fatigue to accomplish something that would otherwise require a Save.
6	Black Lung: Inhaling enough machine smog has given you a degree of immunity to inhaled toxins and other harmful breathable substances.

04 — SMUGGLER

PROFILE

Running contraband goods for underworld clients is a dangerous game, but you’ve gotten good at staying under the radar.

STARTING GEAR

- › Blaster (D6)
- › Stylish Outfit
- › Fake Clearance Codes (1)
- › **GM Optional**, start with a small starship (stolen or indebted) with smuggling holds. It’s currently impounded or stolen.

//:GENERATING SUBJECT DOSSIER...

D6 Lucky Charm	
1 HP	Paired Sudo-Collars: Highly unethical metal collars with a subject-object relationship. If you can get another living being to wear one, they pretty much do what you want. Make a opposed WIL save every day to maintain control.
2 HP	Hummingbird Knife: (D6, Vorpai) Vibrates at subsonic frequencies. Illegal.
3 HP	Loyal Sidekick: Create a freelancer. You’ve been through thick and thin together. Think about how you met.
4 HP	Hacking Sleeve: Mechanized gauntlet with tools to hack, slice, and infiltrate just about any system or mechanical device. 1 fatigue when successfully used.
5 HP	Custom Cape: (Reaction rolls are always one category higher) Flamboyant design of your choice. Looking good is part of the job.
6 HP	Moon Gum: Tastes great. Causes intense hallucinations for 1d6 hours and is effectively immobilizing. Pretty colors... (6 sticks left)

D6	Recent Entanglements
1	Botched Job: You had to dump your cargo in space to escape pursuit by authorities. Your client is furious. You are trying to lay low.
2	Early Retirement Gift: You lifted the goods from a job for yourself and said goodbye to the smuggler life. Unfortunately you are now wanted (alive) for 2000 creds by a major gang.
3	Busted: Mix-up with local system authorities. Well, not so much as a mix-up as...you're blacklisted from there. (Blacklisted in next system you travel to)
4	Flawless Career: You were one of the best and you've managed to retire without incident. Your reputation grants you 10% discount from any underworld dealers.
5	Jail Time: After getting caught, you served some jail time. You're just now getting out and have decided to try a change of career.
6	Criminal Elements: Your smuggling services have recently disrupted a local criminal element's business.

D6	Trick Up Your Sleeve
1	Nine Lives: Once daily, if an attack does more damage than your remaining HP, instead only reduce your HP to 1 and avoid a Save vs Critical Damage. (If this happens a 10th time, Save vs Corruption and add +10 to the Hollowing roll if you fail.)
2	Shoot First: Don't roll initiative in the first round of any combat, just go first.
3	Local Parlance: You instantly pick up the common way of speaking and know how to sound like you belong. This carries massive street cred, especially with criminals.
4	Under the Radar: Any smuggler worth their salt knows how to keep their head down when working - you have an especially effective touch at dodging local authorities.
5	Lovely Eyes: Once a day you may persuade someone who would feasibly find you attractive to do you a favor or believe a lie.
6	Down But Not Out: When you go down after failing a save vs critical damage, you can still fire a one handed gun. This may draw unwanted attention.

PROFILE

You feel most comfortable behind the controls of a starship. Quick reflexes and situational awareness make you an asset in many situations.

STARTING GEAR

- › Mag-boots
- › Junky blaster (D6, cheap, mid-range)
- › **GM Optional**, start with a small Starship. Make it impounded or in need of repairs.

//:GENERATING SUBJECT DOSSIER...

D6 Suited Up	
1 HP	Deluxe Array: Holo-shades (improve visuals in darkness, look slick), armor-lined red jacket (1 Armor), and 2 blasters (D6), pack of alien cigars (blue smoke)
2 HP	Alien Companion: Generate a retainer (merc) with one unique feature befitting an alien species (alternatively can be a droid or other non-human.)
3 HP	Exo-Skin Suit: (1 armor) Nanotech morph suit, conforms to your body, wear under your regular clothes. Has a built in grappling gun and rebreather mask.
4 HP	Stylin': Take a dashing outfit and cloak, silver-plated blaster (d6, replace starting weapon) and a thermal detonator (d6, blast, thermal).
5 HP	Committed to Flying: Take a datajack implant (Cerebral Socket). Installs the back of your head with a jack that allows you to plug into vehicles to more rapidly access special systems and data.
6 HP	Just the Essentials: Take a leather jacket, a stun gun and a retractable baton (D6, concealable)

D6 Flying Expertise	
1	Captain: You have experience leading, and either through admiration or fear, others find your presence to be motivational in dire circumstances.
2	Astro-Navigator: You know your way around space. You never get lost in space and always get around fast.
3	Ace: You always have a few fancy moves when you're in the pilot seat. When you pull off a daring move the results tend to go in your favor, at least on the first try of the day.
4	Union Licensed: It was an honest living. Other pilots respect that. You get union discounts for yourself and friends with starport docking, lodging, and buying anything starship related.
5	Syndicate Contractor: Any reaction rolls or social encounters with professional syndicates are one category higher, or more favorable in another abstract way.
6	Test Pilot: You can pilot anything, and are experienced at operating vehicles that are damaged or partially broken. If your ship takes critical damage, delay the negative effects for 1D4 rounds.

D6 Other Talents	
1	Hot-Wiring: You know how to cross the right wires to get vehicles running that don't belong to you.
2	Hard Turns: Gain an additional point of mobility in any starship you're piloting.
3	Lead Foot: Gain an additional point of movement in any starship you're piloting.
4	Energy Efficient: You know how to turn dashboard systems on-and-off in such a way that your shields have an additional +1.
5	Counter Tactics: If you lose initiative at the start of starship combat, the first attack your ship makes will be enhanced.
6	Witty Banter: During starship combat, hilarious yelling or witty banter with a co-pilot or onboard A.I. allows you to automatically succeed on a single critical damage save a day.

06 — MACHINE

PROFILE

All machines have a purpose. What was yours, and what will it become? Machines can only take **cyberware** augmentations. They must make sense for your model type. You **do not need to eat or breathe** and cannot take damage from sources that rely on those functions (breathing, poison, etc). You are **immune to mind-altering effects**. You must sleep (re-boot/defrag/update) roughly as much as everyone else. **Shock does double damage**.

STARTING GEAR

- › Short Rifle (D6, bulky)
- › Antivirus.EXE (1 use, removes 1 fatigue)

//:GENERATING SUBJECT DOSSIER...

D6 Custom Hardware	
1 HP	Heat-Wave Optics: (D8, or D6 blast, thermal) Eye lasers. Take 1 fatigue.
2 HP	Reinforced Casing: If you take max damage from an attack, half it.
3 HP	Auto-Targeting Subroutine: Re-roll damage results of 1.
4 HP	Overclocked Processors: Re-roll 1 DEX save a day.
5 HP	Hidden Storage: Two extra inventory slots inside your chassis.
6 HP	High-Speed Data Jack: Improved hacking into networked systems.

D6	Model Type
1	Droid: Standard bi-pedal, humanoid robot. Explain your original purpose and what you look like. You have natural +1 armor.
2	Android: You look mostly human. You are not. Synthetic androids are often discriminated against. Your build quality is fluid and graceful, take +1 DEX.
3	Rogue A.I. Your chassis is a bit unconventional, as you are primarily an A.I. core that escaped via hacking into and commandeering another vessel. Explain how your frame is built. You can temporarily swap bodies with other machines, taking them over, for 1d4 hours (1 fatigue).
4	Lazarus Machine: You are the last remains of an intelligent organic being, and mostly brain tissue at this point. Your consciousness was uploaded into this robotic body. Your chassis was designed to be heavily modded. 50% discount on all cyberware.
5	Bio-Synth: You're composed of a mix of mechanical and biological parts. You can use and get a 50% discount on genetic modifications.
6	Incomplete Prototype: You function well enough, but were never fully completed for the original purpose of your build.

D6	Manufacturer
1	Jury-Rigged: You are composed of several lightly used parts from various other machines by an unknown builder. Some components weren't installed correctly.
2	Military-Industrial: You were built for tactical military purposes.
3	Savant Engineer: You're the creation of a genius inventor.
4	Alien Society: An alien species built you, and it shows in your build. Explain your unusual appearance.
5	Ancient Maker: This manufacturer and all of their creations are long gone. You're rare, incredibly antiquated, yet still in immaculate condition.
6	Megacorp: Your line has been mass produced for a giant corporate entity.

07 — UNDERWORLD

PROFILE

Just another low life trying to make a few creds. You likely have ties to other criminals and criminal organizations, syndicates, and less reputable individuals. Whether you worked for them, worked alone, or had some other arrangements might depend.

STARTING GEAR

- › Old Shotgun (D6 blast, bulky, cheap)
- › Smart meds
- › Bolt cutters

//:GENERATING SUBJECT DOSSIER...

D6 What Keeps You Safe on the Streets?	
1 HP	Ultraviolet Shotgun: (D8 blast, cryo, illegal). Black market weapon that emits sub-zero wavelengths. Particularly devastating to unarmored flesh.
2 HP	Heart-Stopper Helmet: Face-mask that looks like a devil (+1 armor) and emits a low-frequency hum, unsettling others. Can discharge a 30' sonic blast (D6 sonic) once a day.
3 HP	“Brick”: Take a freelancer (merc) with 12 STR, 8 DEX, 6 WIL, 3 HP, Billhook (D6, bulky) They’re not the brightest bulb, but they’re pretty large and intimidating. Rename if you wish.
4 HP	Red Hyena: (6 HP, 14 DEX, D6 bite, critical damage save vs STR or break a bone) A very large, red coated hyena. Obeys you via a neural link, but some of its affection might be natural.
5 HP	Prototype Vibro-spear: (D8, bulky, shock) Considered a truly nasty weapon.
6 HP	Synth-weave Duster: (1 armor, lots of pockets) It’s like a jacket only it’s longer, thicker, and far more bad-ass.

D6	Type of Scum
1	Thug: You are good at cheap shots. Attacks are enhanced on an enemy that has been hit in the same round.
2	Fence: You always know someone from whom to get more creds from selling treasure.
3	Scoundrel: You worked for yourself. +1 HP and take a lead on a lucrative job.
4	Goon: You did the shakedowns. You impose DIS on anyone making a WIL save against your intimidation efforts.
5	Ex-Syndicate Captain: You used to be a top dog in a syndicate until you were double crossed and kicked out. Roll a random Ex-Tech you “liberated” on the way out.
6	Fixer: You were a fixer, setting up jobs for the criminal underworld. You can negotiate for higher pay on jobs involving criminal activity.

D6	Criminal Knack
1	Know A Guy: You can figure out how to contact someone seedy in any city after an hour of asking around.
2	Forging Documents: Can make a fake ID for 50 creds, and other similar forgeries of varying quality depending on costs.
3	Cheating: If you’re gambling, playing games of chance, or making some sort of agreement with someone, you’re especially good at cheating and not getting caught.
4	Talking Shop: Reaction roll results are always one category higher with others of the criminal persuasion.
5	Politically Crooked: You know how governments work and just how corrupt politics can be. Any factions of the government variety deal favorably with you.
6	Sticky Fingers: Picking pockets, lifting goods, and general larceny comes quite easily to you, granting you ADV if you take a measured, intelligent approach with the proper tools.

08 — PSIONIC

PROFILE

A power within you has awoken. Whether from trauma, an evolving mind, or some other key, the locks have started to open on a deep seeded source of power.

When a psionic character undergoes major stress, trauma, or levels up, consider letting them awaken a new power. Optionally, instead of new powers, consider evolving the effects of their awakening ability.

STARTING GEAR

- › Cheap blaster or small melee weapon
- › Fake I.D.
- › Adrenaline injection (1)
- › Candy bar

//:GENERATING SUBJECT DOSSIER...

D6 Psionic Awakening	
1 HP	You are Gifted. Shatter: Your voice echoes with the sound of an earthquake, causing d8 damage (blast 20') to creatures, and shatters delicate objects. Take 1 fatigue.
2 HP	You are Psychic. Read Thoughts: You can hear the surface thoughts of nearby creatures and can communicate telepathically, either clearly in languages you know, or a general sense of emotions in languages you are unfamiliar with.
3 HP	You are Telekinetic. Telekinesis: You may mentally move an item under 60lbs. Take 1 fatigue.
4 HP	You are a Mesmer. Spectacle: A clearly false but impressive illusion of your choice appears, under your control. It may be up to the size of a palace and has full motion and sound.
5 HP	You are a Precog. Vision: Once a day, roll a 1d20 and keep that roll. You may substitute that roll for any Save you, an ally, or an enemy makes after seeing the results. Gain 1 fatigue when you roll your vision and keep it in inventory until the dice is used.
6 HP	You are an Esper. Calm: A creature you can see is soothed and treats you as a friend for 1d6 hours. Take 1 fatigue.

D6	Old Cover Identity
1	Ship Crewmate: You got by as a shiphand. You have technical know-how of starships. Take a blow torch and super glue.
2	Corporate Processor: Hiding in plain sight, day to day, was quite boring. You know the ins-and-outs of bureaucracy, and usually roll with ADV when making any rolls involving corporations or business.
3	Private Investigator: Your powers are quite useful when it comes to P.I. work. Take infrared smart-binocs and an area scanner. Oh, and a cool hat.
4	Charlatan: <i>A fool and his money</i> , as they say. Running scams are just easier when you have psionic. Take 10d6 credits and a low level bounty for petty crimes.
5	Pilgrim: You lived a simple life following the path inside. You learned to open your mind and attune to your gifts. Roll another random psionic power.
6	Military Peon: The rigorous life of a military grunt was a simple way to get by. Your service is up now. Take a Shard-sprayer (D8 blast, bulky) and grunt armor (Armor 1, bulky).

D6	Neural Ramifications
1	Draining: You are always so utterly tired. Permanently mark off one inventory slot.
2	Med-Addicted: You only recover fatigue from staying at a hospital or taking expensive stims (50 C). Optionally you can heal normally and Save vs. Corruption
3	Paranoid: <i>"Who's there?!"</i> Whenever you are surprised or ambushed, you always go last in the first round.
4	Split Personality: It's not you who has these brain problems, it's the other one in your head!
5	Surly: You come across a little coarse. People of higher social standings naturally don't like for you.
6	Empathetic Overtuning: When an ally saves vs. corruption, you do too.

09

— SCIENTIST

PROFILE

You’ve spent most of your life dedicated to the advancement of science. Due to new circumstances, you’ve decided to make the change from lab work to field work.

STARTING GEAR

- › Lab coat
- › Test tubes (6) & assorted medical tools
- › Plasma-Knife (D6 thermal, concealable)

//:GENERATING SUBJECT DOSSIER...

D6 Prized Lifetime Research	
1 HP	Skeletal Resonator: Attract or repel a single target that has a skeleton, unless they pass a STR save. No effect on cartilage.
2 HP	Portal Generator: Create a portal between two flat sources that you can see. The gate closes if you pass through or break line of sight. Causes 1 fatigue.
3 HP	Temporal Bomb: Time slows down 60 times in a 20 foot sphere (blast). Lasts for 1 minute outside the sphere, or one second inside. One use.
4 HP	Corpse Reviver #42: Brings back the dead if used within 1 minute of death. One use.
5 HP	Particle-Mirror Array: (+1 Armor) A molecular shield generator. Once a day, make a DEX save to reflect energy weapon shots back at their source.
6 HP	Creature in a Jar: A baby sludge creature with one eye. Upon release, it will eat a corpse’s brain consuming its memories, effectively allowing the user to ask a corpse one question. The fresher the corpse, the better the memory. Needs a day to rest before it will come back out.

D6	Field of Expertise
1	Medical Doctor: Take medical supplies that can restore 1d4 STR a day.
2	Molecular Chemist: Take a vial of universal solvent, which dissolves anything it touches. Enough for a brick-sized portion. One use.
3	Experimental Physicist: Take a can of de-friction spray. 3 charges.
4	Xeno Biology: Take a strange alien Gecko-Fox as a pet. (3hp, 14 DEX, d6 bite, can climb sheer surfaces, must be fed something living once a week)
5	Toxicology: Years of experimentation, immunity-building & study have provided you an immunity to all known poisons, and reduced effect on failed saves against unknown or alien toxins and poisons.
6	Higher Dimensions: Prying open the secrets of the universe have exposed you to things you can't explain. Roll for a random Astromancy.

D6	Why You Left Science
1	Uncouth Research: You dabbled in things that are frowned upon and were run out of academia. Start with 3 corruption.
2	Malaise: You wanted new challenges and life in the lab just wasn't cutting it anymore. Roll a random talent.
3	Blackmail: A rival researcher, competitor, or criminal organization implied that if you didn't stop your current research, they'd stop it for you.
4	Lab Accident: There's a corporate-sponsored bounty on your head for damage to company property.
5	Research De-funded: Due to budgetary issues, your research has been placed on permanent hold. Sorry.
6	Field-Research: You wanted more hands-on experience in your field.

10 — SOLDIER

PROFILE

You're ex-special ops. Having completed or parting with your duties, new opportunities are calling your name.

STARTING GEAR

- › Tactical fatigues
- › Shotgun or Rifle
- › Dog tags

//:GENERATING SUBJECT DOSSIER...

D6 Special-Issue Equipment

- | | |
|------|---|
| 1 HP | Gate Cloak: Hooded cloak inscribed with nano-particle algebraic equations that allows the user to phase-shift 10' in any direction instead of taking damage. One use a day. |
| 2 HP | Mark IV Executioner: (D8 blast, silencer) A combat shotgun created by a legendary weapons manufacturer - limited run. Replaces starting weapon. |
| 3 HP | Kinetic Katana: (D8, bulky, thermal) An alien weapon you recovered. Slender black blade sheathed in a metal casing. Vibrates at subsonic levels producing an intense heat and orange glow. On a roll of maximum damage, the target must make a STR save or be fatally severed in half. |
| 4 HP | RNA-Attuned Shield Generator: (+1 Armor, immune to bio damage) Gene-synthesized custom shield generator. Prevents illness. Take a few cigars too. |
| 5 HP | Dual-Oculus Hooded Mask: A hooded faceplate mask with two circular smart-display goggles. Allows for perfect vision in darkness and other debris via A.I. aided image sequencing. |
| 6 HP | Cockatrice Claymores: 3 remote-operated explosives that explode with a gray bio-synthetic dust. (blast 40') Make a STR save or instantly be turned to stone. |

D6 Spec-Ops Team	
1	Infiltration: Stealth unit. Once a day you automatically succeed when prompted to make a Save to move quietly, in shadows, balancing on precarious surfaces, or similar risky actions.
2	Heavy Marine: Heavy unit, breach specialists. Increase STR to 13 if not currently at 13.
3	Flash Commando: Light unit, worked in small teams. Re-roll damage rolls of 1.
4	Shock Trooper: Special weapons drop troopers. Add shock damage to your starting weapon.
5	Counter-Insurgency: If fighting in small, confined urban spaces, your first attack roll in combat is enhanced if your weapon is suited for close-range (melee, shotgun)
6	Top Secret Project: You were part of an experimental top-secret project. Start with a bio-aug. Roll augment and re-flavor.

D6 Squad Job	
1	Cook: Once a day you can stretch out a single ration to feed the whole party if you spend 10-minutes preparing it with cooking tools.
2	Negotiator: You can attempt to negotiate mid-combat. Make a WIL save, on a success enemy reaction is improved and the fighting temporarily halts.
3	Quartermaster: Two extra inventory slots in your backpack.
4	Scout: You and your group can never be ambushed if you are at full HP.
5	Demolitions: Take 2 thermal detonators. If you set up an ambush with explosives the damage is enhanced.
6	Point Man: You have an additional 2 HP when you're at the front of the marching order.

11 — STAR-TOUCHED

PROFILE

The living void and its myriad aspects reach out to you. You now belong to some greater purpose, or vaster intelligence, and have been gifted with a sliver of that power to wield as the envoy of forces you could not possibly comprehend.

STARTING GEAR

- › Nothing can truly be possessed. You start with nothing but your clothing.

//:GENERATING SUBJECT DOSSIER...

D6 What Gift Did the Stars Bring?	
1 HP	The Deplorable Word: Anyone you speak the word to must make a WIL save or take 1d12 WIL damage. Use once a day. WIL save vs corruption.
2 HP	Carried By the Wind: Fly: Can fly once a day for 2d6 seconds at your normal movement.
3 HP	Puzzle Tongue: Comprehend Languages: Can speak to, understand, and be understood by all spoken languages of approximately human-level intelligence.
4 HP	Warding Scriptures: Your body is covered in a glowing script. Once a day when an attack is made against you for maximum damage, the damage is reverted back to the attacker. Save vs corruption as the scriptures crawl further into you.
5 HP	Sunder: You can attack with your mind and two free hands for D6 damage from up to 60 ft. Does not cause fatigue.
6 HP	Glittering Gate: Spend 10 minutes performing a ritual in a 10' circular area. Star-blessed spaces exist as a dyad, and only two can exist at once. Stepping into one space transfers those who enter to the other space. When a new space is created, the creator mentally chooses one of the existing two locations to dissipate. All who pass through this void space must save vs corruption.

D6 Your Vision	
1	A Thousand Burning Suns: Your eyes smolder. Fire does not harm you.
2	The Forever Deep: You can breathe underwater and are never cold.
3	Abhorrent Geometry: You are immune to mind-altering effects.
4	Belly of a Black Hole: Your eyes are pitch black. You can see in the dark.
5	The Secret Truth: You cannot understand or speak it. You can sense any untruth you hear.
6	Perfect Symmetry: It was almost too beautiful to behold. Social encounters are much easier for you. Reaction rolls in social situations are always one category higher than your result.

D6 What Was Taken?	
1	Your Voice: You can speak, but at a slow, strained crackle that sets others on edge.
2	Your Memories: The past before you touched the infinite is insignificant, burned away to ash. You remember nothing from before.
3	Your Mind: Whenever you gain fatigue, roll a d6. On a 1, you spend the next round clutching your head and babbling. Addiction-inducing stims will calm you.
4	Your Superego: Societal morality must be relearned, or perhaps simply left behind entirely.
5	Your Future: Once a week you must make a save vs. corruption. Slowly your future is rotting away.
6	Your Humanity: Roll on the mutations table (pg. 89)

12 — BOUNTY HUNTER

PROFILE

It's a slimy, treacherous world out there, and you had to be just as nasty to keep the wolves from the door. You made your living as a licensed bounty hunter.

STARTING GEAR

- › Rifle or two blasters.
- › Old Armor (Armor 1, Bulky)
- › Manacles
- › Bounty Hunting License & Union Membership.

//:GENERATING SUBJECT DOSSIER...

D6 Specialty Tool	
1 HP	Visage of Dread: (+1 Armor, immune to mind-altering effects): Skull helmet (or something intimidating). At the start of combat, enemies save vs WIL or cower in fear for 1 round.
2 HP	Heat-Seeking Sniper Rifle: (D10) One mile range. 9-10 damage on the first shot of combat or from a hidden position is an instant kill.
3 HP	Grave-Foam Gauntlet: Sprays a liquid cloud of gray dust, forming a 12 inch thick casing around the target for 1d12 hours. Nothing inside can break out. The casing keeps its contents alive in a safe stasis until released. 1 cartridge of fuel (3 uses). Buy more fuel from Bounty Hunters' Union.
4 HP	Shock Dart: (D6, spec ammo) Wrist mounted rocket dart. DEX save vs paralysis for 1d6 minutes.
5 HP	Wire Shot: (grappling) Wrist-mounted. Shoots a magnetic smart-wire that wraps around and ensnares targets. Dex save or completely grappled. No save if surprised.
6 HP	Trick-Axe: (D8, bulky, sweep): Can retract down to 3 feet in length for (D6).

D6 How Did You Hunt?	
1	Like a True Hunter: You hunted for trophies and glory, and by any means necessary. Take a notorious reputation and a war dog companion (d6 bite, 2 HP, 12 STR, 60' speed)
2	From the Shadows: If you get the jump on someone from hiding, your attacks are enhanced.
3	With a Personal Code: Other hunters and those in the community respect you. You can request an audience with typically inaccessible underworld leaders.
4	Loaded With Tech: Take 1d4 smart grenades (d6 blast, thermal, grappling) an auto-saw, and binocs.
5	By Any Means Necessary: It was sometimes dirty, or unfair, but you got the job done. Any damage from traps, snares, or other preparations you make are enhanced.
6	Just for the Money: It's only a job, after all. Negotiate for double payouts on any bounty job. The NPC offering the job must pass a WIL save to resist, otherwise they're persuaded to pay extra.

D6 A Past Complication	
1	Revenge: An old target escaped from prison and is after you. The hunter becomes the hunted...
2	Wanted: You crossed the wrong syndicate. You're now a wanted (alive) individual in 16 systems.
3	Radio Silence: Your old primary fixer and contact went silent. You worry they may be compromised, or worse.
4	Old Dog: Injuries, a hard life, and general wear and tear has taken its toll, and you're not as spry as you once were. Sometimes that comes back to bite you.
5	Imposter: After you left the scene, someone else recently appeared claiming to be you, and they're ruining your hard-earned rep. Undealt with, it could have some unpleasant consequences.
6	One Last Job An old client really needs your help on one last job. Word is the pay is high...high enough for a lot of other hunters to also be on the hunt.

FINISHING TOUCHES

Optional tables to help flesh out what a character might look and behave like if a player would like additional random elements or help fleshing out a character. There are extra tables in the back.

Physique	
1 Athletic	6 Towering
2 Stout	7 Lanky

GROUP DEBT

The group will start with a shared debt. This will help facilitate urgency for the players by prompting them to search out jobs and make money, as well as provide the GM with world building and story prompts. The debt is for 10k credits unless otherwise specified.

D12	Description
1	Black Carapace Syndicate: The insectoid crime lord, Narakata the Ninety-ninth, wants you to repay an unpaid gambling debt, preferably in the form of illegal goods or rare artifacts, which will count as double their value in repaying this debt.
2	Herod: Infamous slumlord and galactic realtor. You all own equal shares of a small, habitable moon in a nearby system. Roll random qualities to determine what kind of moon it is.
3	PEACHBOY™: Galactically-renown tech innovators. You are all decked out in the latest chrome. Everyone gets a unique cyberware mod. Until the debt is paid, 50% of the credits you earn are automatically deposited from your accounts to PEACHBOY™.
4	Mama Sook: The elderly, devious leader of the Broken Nail Club, a smuggling ring. You unwittingly crossed paths with her operations and interfered with her business. She requires restitution in the form of running contraband.
5	Libra Wasteworks: Indebted for disposing of illicit goods for you. They want repayment in the form of questionable favors from time to time. Until the debt is paid, you will be pressured into doing their bidding or else face problems with local governments.
6	Echo Collective: A workers' union that charts unexplored systems.
7	Funeral Smoke: One of the most notorious merc squads in the known galaxy. They purchased your old debt from a debt bond company. Until you pay your debt, you are registered as low level contractors for doing some of the squad's dirty jobs.
8	Mr. Hoodwink: Loan shark and bookie known for their cruelty and wide political influence network. You can pay your debt off faster if you help with...collections.
9	Simulacrum: Biotech industry research collective. Your activities interrupted their ongoing research. They seek repayment of those damages in the form of scientific data or discoveries that might be valuable to their business.
10	Tigerjack & Rook: Major law firm known for representing less savory clientele. They've taken care of some legal issues for your group and expect payment in cash. Soon.
11	The Crumbling Voice: A dread presence that communicates with you all through your dreams. It desires a particular artifact to be placed in a specific location. Until the debt is paid, save vs corruption at the start of every session.
12	Gray Pegasus Security Corp: You owe them for wiping all traces of your party from public records. A clean slate. They want payment in the form of sensitive information from a rival faction. If the debt isn't paid within three months, they will leak all of your sensitive information on all known public and criminal networks.

COMPLICATIONS

If you need to generate complications for chaotic actions, downtime mishaps, or just to introduce dramatic tension, the table below offers some interpersonal complications for the PCs. Suggestions and examples are in parentheses.

D12	Your Character	D12	NPC
1	Owes a debt to... (for saving their life/losing badly at cards.)	1	Local governor or politician (Cruel/ Easygoing/Inept/Greedy)
2	Is hated by... (for betrayal/an offense/stealing from them)	2	Local politician's spouse (Addict/ Pompous/Scheming)
3	Is rivals with... (embarrassed them or by them/professional feud.)	3	Drug trader (Dangerous/Well known/ Sleazy/Professional)
4	Knows a secret about... (secretly working for another/criminal activity.)	4	Cantina owner (Involved in illegal activity/Best drinks around/dark past)
5	Has been framed by... (for murder of/theft from a 2nd NPC)	5	Psionic hermit (Trying to forget their past/hiding from local authorities/ seeking strange knowledge)
6	Is adored by... (and is stalking you/ friends or family want you gone)	6	Arena fighting champion (In their prime/past prime/up and comer)
7	Is drinking buddies with... (and now they're in trouble with the law/ creditors/criminals)	7	Pirate captain (Cocky corsair/ Murderous cutthroat/Quirky enigma)
8	Promised to help... (open their new business/do something illegal/kidnap someone)	8	Bounty hunter (Psychopath/Old-timer/Known professional.)
9	Is being extorted by... (they have incriminating evidence and want you to recover an artifact/kill someone/ smuggle them off-world)	9	Wanted criminal (Forgery/Grand-theft Starship/Murder of important persons)
10	Is suspicious that... (NPC is secretly a top bounty/political spy/person from your past)	10	Notorious gambler (Card shark/Dice Cheat/Famous savant)
11	Is seeking revenge from... (for something from your past/robbing you.)	11	Syndicate leader (Vindictive/ champion of the people/Sleazeball)
12	Is being hunted by... (for killing their friend/unknowingly interfering with their business/majorly offending)	12	Celebrity (Pop star/Lounge musician/ racing champ/retired duelist)

VICES

ABOUT VICES

Vices serve as both character growth and a way to pressure PC's pockets and keep them continuing to adventure & acquire wealth to support their vice. A vice is a nice way to bleed a player's wealth as they begin to accumulate more. A player typically shouldn't have more than 1-2 vices.

GAINING A VICE

Make a **WIL Save** after character creation. Upon failure, roll a D10 and begin with that vice.

Vices may also be acquired through the fiction of play. Consult the triggers for suggestions on what might trigger a character to develop a vice. A character must pass a WIL save after hitting a trigger or acquire that vice.

SATISFYING VICES

Vices must be satisfied once a week or the PC must pass a WIL save. Failing a WIL Save adds the deprived condition until they satisfy their vice. Satisfying a vice should cost money in some way, whether directly with money or indirectly via resources.

GAMBLING

Playing cards, throwing dice, or other forms of risking money on games of chance.

ALCOHOL

Drinking ale, wine, spirits, or other alcoholic beverages that intoxicate your senses.

DRUGS

Narcotic delights to smoke, snort, or consume in search of oblivion.

LUST

Pleasures of the flesh such as dalliances with strangers or paid sex workers.

LUXURY

Expensive clothing, decadent food, art, and general opulence.

WEIRD

Consorting with ancient beings, contacting unknown entities, and performing forgotten or forbidden rituals.

OBLIGATION

Devotion to a cause, organization, charity, or family.

VIOLENCE

Spectating extreme violence or participating in the bloodshed yourself.

FAITH

Dedication to a power, deity, ancestry, or other belief system.

AMBITION

Pursuing a personal goal, vendetta, or long-term project.

D10	Vice	Triggers	Satisfying
1	Gambling	Major win or loss at a high stakes game or wager.	Gamble with at least 10% of your personal wealth, wager a unique/useful/powerful item, put other major stakes up.
2	Alcohol	Consuming large amounts of booze, drinking heavily for multiple days.	Binging heavily, buying rounds for the whole bar, brewing your own booze.
3	Drugs	Indulging in addictive substances, overuse of stims/chemicals/boosters.	Regularly indulging in your addiction, massive binges, expensive synthetics or cures.
4	Lust	Regular visits to brothels, unique or novel sexual experiences.	Indulging with new partners, frequent copulation, finding lusty or kinky novelties
5	Luxury	Experiencing massive decadence, acquiring rare forms of wealth.	Blowing your money on ostentatious displays, buying expensive clothes/food/art, patronage of an artist or savant.
6	Weird	Consorting with strange entities, exposure to forces beyond comprehension.	Discovering forbidden knowledge/magic/items, growing weirder, gaining corruption, learning weird secrets.
7	Obligation	Experiencing charity or aid, supporting another through difficulty, developing a strong sense of duty.	Supporting your obligation through financial assistance or help.
8	Violence	Regularly spectating or participating extreme violence, especially as entertainment.	Watch or bet on bloodsports, participate in bloodsports, commit an act of extreme violence.
9	Faith	Close encounter with a supernatural being, near death experience, discovering something faith-related about your past.	Paying tribute, tithe, sacrifices with expensive materials, donations to causes.
10	Ambition	Desiring something grand from being greatly impressed (building a keep, raising an army, attaining status.)	Making significant progress toward your ambition. Spending money towards your goal.

GEAR PACKS

As an alternative to rolling a background, players may choose to start with a starting gear pack. Match your highest Ability Score against your HP to find your starting package. This can also be a quick way to outfit a freelancer hiring. Weapons either have their damage listed or are common equipment found on page 40. If not, GMs can make a call on how best to stat those items.

	1 HP	2 HP	3 HP
< 9	Backup Heart (aug), Talent, any 2 weapons, Artifact	Ex Tech #14, Plasma Shotgun, [Robotacist] Tech Suit (Armor 1)	Laser Rifle, Ex-tech, Immunity to extreme temperatures
10	Psionic #22, Ghostglass Sword (D8 Deadly), glowing tattoos	Astromancy, Energy Rifle, Ancient Armor (Armor 1, bulky), 100 scars	Hook-blade (D10), Merc lackey, Area scanner, Flare gun, Artifact
11	Ice Rifle (D8 cryo, bulky), Advanced armor (Armor 2, environment protection), Ex-Tech	Sonic Hatchet (D6, exploding) Bolt cutters, Blood Hawk (D6 claws), Gasmask, Artifact	Silenced Rifle, light armor, Grappling gun, Auto-lock slicer
12	Furnace-Pick (D8 thermal, bulky), Manacles, Hound (D6 bite)	Beam-axe (D8 thermal), manacles, fiber rope, Artifact	Plasma carbine, claymore, antivirus.EXE (2), you're a droid
13	Two blasters, Thermal detonator, Pack of cigarettes, Rum	Blaster, Vibro-saw (D8 exploding, bulky) Chrome Armor Suit (Armor 1, bulky)	Laser pistol (D6), worn cloak, Shield gen (+1 armor) 4d6 credits
14	Sniper Rifle, Area Scanner, Binocs, Artifact	Crowbar (D6), thermal detonator (2), mask, Astromancy	Infrared visor, Curved blade (D8), Baggy synthweave blue outfit (Armor 1)
15	Titanium mace (D8), Strange mask, Ether, Persistent cough	Photon Coilgun (D8, Bulky, EMP), Service droid (4 inventory slots, can't fight)	Junky rifle, ether, hacking tools, Seedy local contact
16	Stun-Rod (D6, shock), Infrared visor, Rubberized Armor (Armor 1, bulky, shock damage resistant)	Knife, Electric Net (D4 shock), Auto-lock slicer, Superglue	Dueling sword (D8), Pet crow, Fire Oil (D6 blast), Burnt Face
17	Antique sword (D6 Serrating), armored cloak (+1 armor), Fake I.D., "Wanted Alive"	Astro-staff (D8, Sweep), manacles, Cheap prosthetic leg	Sledgehammer, Drill, Duct tape, Persistent Wheeze
18	Cheap rifle, Electrical tools, Severely Alcoholic (deprived unless 1D4 daily drinks)	Cheap blaster, Fugitive, Psionic	Antique pistol (cheap), Gas mask, Acid, Burnt face

OTHER NOTES

› If an entry says “artifact”, “ex-tech”, “psionic”, “astromancy”, “talent” or “mutation” without an indicated number, roll randomly.

4 HP	5 HP	6 HP
Hail Blaster (D6 cryo), Enviro-suit (environmental protection), Smart meds (2)	Machine gun, Crimson Battle Armor (Armor 2), Obscure royal status, Astromancy	Arc Ray, Heavy Armor, Immune to poison, Artifact
Deluxe blaster (D8), Plasti-steel cuirass (Armor 1), Ex-Tech, Psionic #14	Plasma Carbine, Adrenaline Injection (3), Grappling Gun, Ex-Tech	Energy Rifle, Robot Merc, Light Armor, Lucrative job lead
Omni-Helm (+1 Armor, breath all environments), Energy Rifle, Talent #18	Plasma Shotgun, Talen #11, 1,000 credit downpayment on cyberware	2 Knives (D6), Psionic #46, Medkit, Talent #12
Repeater Cannon (heavy weapon), Shield Gen, Green wolf with telepathic link	Duct Tape, Binocs, 2 Pistols (D6), a pet cat	Plasma Maul (D8 thermal), Fiber Rope, Gasmask, Smoke Bomb (2)
Blast putty, Blowtorch, Soot-stained heavy armor (Armor 2, bulky) Slag-club (D6)	Grappling gun, auto saw, blaster, Rope	Sledgehammer (D8, bulky), Thermal Detonator (2), Drugs
Silenced Energy Rifle, Shock trap (shock, blast), Binocs	Collapsible baton (D6), the title to an occupied ship, drill	Sling blade (D6, Sweep), Combat Stims, Duffel Bag
Sniper Rifle, Drone Cam, Smart meds (2)	Proto-Steel Saber (D8), Shield Gen (+1 Armor), Area Scanner	Laserblade Gauntlet (D6 Thermal), Auto-saw, Compass, Gin
Brass knuckles (D6), Duct tape, Cigars, Burns on face	Stun Gun, Baton (D6), Fake I.D., Missing eye	Blaster, Shovel, Claymore, Glowing Eyes
Cheap rifle, Disfigured, Deck of cards	Alien Species (generate your alien traits on pg. 82) Mutation, Engraved Spoon	Rusty harpe (D8, Bulky), Superglue, gum (fruity tootie)
Hook staff (D8, sweep), Illiterate	Cheap blaster, missing hand, bad local reputation	Cane (D6), Rat, Disfigured

ARMORY

STANDARD WEAPONS	COST
Unarmed (D4 melee, -1 if opponent has armor)	-
Small Melee (D6) Dagger, club, fist weapon.	100
Medium Melee (D8) Vibrablades, plasma axes, shock staves.	200
Large Melee (D10, bulky) Energy glaives, chain-blades.	300
Stun Gun (DEX Save vs Impaired 1 round, S-R, recharges in 1 round)	100
Tranquilizer Gun (STR Save vs Impaired 1 round, S-R, must spend a round reloading)	100
Junky Blaster (D6, Cheap, S-R) Ballistic rounds, junky pulse rounds.	100
Junky Rifle (D8, Cheap, mid-range) Ballistic rounds, junky pulse rounds.	150
Blaster (D6, short/mid-range) Particle beam energy bolts.	300
Rifle (D8, bulky, mid/long-range) Particle beam energy bolts.	500
Uzi (D6 blast, mid-range) Particle beam energy bolts.	800
Shotgun (D6 Blast, bulky, close/short range) Particle beam energy scatterbolts.	500
Sniper Rifle (D10, STR damage when hidden, bulky, long-range) Particle beam energy bolts.	1,000
Repeater (D10 or D8 blast, bulky, mid-range) Particle beam energy bolts.	1,200
Flamethrower (D10 blast, thermal, bulky, short-range) Fire!	1,500
Heavy Weapons (D10 or D8 blast, bulky) Particle Beams, Mini Guns.	1,500
Stationary Weapons (D12 or D10 blast, stationary) Machinegun Turrets, Cannons.	2,000

HIGH ENERGY WEAPONS	COST
High-Energy Blaster (2D4)	600
High-Energy Uzi (2D4 blast)	1,600
High-Energy Shotgun (2D4 blast, Bulky)	1,000
High-Energy Rifle (2D6, bulky)	1,000
High-Energy Repeater (2D6 or 2D4 blast, bulky)	2,000
High-Energy Sniper Rifle (2D8, vs STR when hidden, bulky)	2,000
Arc-Ray (2D6 shock, bulky)	2,000
Pulse Axe (2D4 Cryo) Melee handle with torch-like energy blades.	1,000

SMART WEAPONS	COST
Add on price to Standard Weapons.	
Smart Blaster (D6+D6)	+200
Smart Uzi (D6+D4 blast)	+300
Smart Shotgun (D6+D6 blast, Bulky)	+200
Smart Rifle (D8+D8, bulky)	+200
Smart Sniper Rifle (D10+D10, enhanced when hidden, bulky)	+300
Smart Repeater (D10+D10, or D8+D8 blast)	+300

AMMO	COST
High-Energy Cells	200
Smart-Cartridges	100
Specialty Ammo/Fuel	1-300

ARMOR	COST
Vac-Suit (Armor 1, bulky) Allows for breathing in hostile environments.	200
Light Vest (Armor 1)	500
Combat Suit (Armor 2, bulky)	1,000
Heavy Combat Suit (Armor 3, bulky)	2,000
Shield Generator (+1 Armor)	500
Helm (+1 Armor)	500
Rebreather Helm (+1 Armor) Allows for breathing in hostile environments.	800

EXPLOSIVES	COST
Flash Grenade (DEX save or stunned for 1D4 rounds) Ineffective against machines and smart helmets or eye protection.	50
Thermal Detonator (d6, blast, thermal) Beep...beep...boom.	50
Claymore (d8 blast) Set the charge and stick to most solid surfaces. Anyone who moves within 5' will activate the explosive.	150
Blast Putty (d6 blast, thermal) Must be applied to a surface. Triggered by interaction.	100

CONSUMABLES	COST
Adrenaline Injection: (1 use) Inject directly into heart. Clears 1 fatigue. Using more than 1 a day may cause heart issues.	200
Combat Stims: (1 use) Gain 1D6 temporary HP for 10 minutes.	300
Smart Meds: (1 use) Heals 1D4 STR or 1 fatigue. Overuse may cause addiction.	300
Antivirus.Exe (1 use) Insert chip into machine to clear 1 fatigue. Using more than 1 a day may cause operating system bugs.	300

EQUIPMENT

GEAR	COST
Data-Comm: Handheld device that can make short range calls (planetary), access local data networks, and perform basic everyday functions like analyzing data chips, making transactions, and recording information.	100
Gasmask: Protection against breathable hazards. Filtration d8 usage.	250

TOOLS	COST	TOOLS	COST
Flashlight (80' light, directional)	200	Auto-saw (1D6 uses)	80
Glo-torch (40' light/40' dim light)	50	Grappling Gun	250
Rations (1 days worth, small)	10	Compass	25
Fiber Rope (50')	25	Binocs	75
Drill	100	Drone Cam	125
Super Glue (3 charges, small)	50	Area Scanner	100
Auto Lock-Slicer (1D4 uses)	125	Duct Tape	10
Mag-Boots	150	Blowtorch (1D6 uses)	150
Rebreather (oxygen recycler)	100	Bolt Cutters	50
Medkit	50	Duffle Bag (4 inventory slots)	50
Electrical or Engineering Tools	100	Fake ID (small)	200
Flare Gun (3 uses, D6 thermal)	150	Manacles/Mag-Cuffs	40
Sledgehammer (D8, bulky)	50	Shovel	20
Infrared Visor	50	Starship Fuel (1 tank)	200

LAND VEHICLES (DAILY RENTING PRICE IS 1/10 TH COST)	COST
Droid Cart: 4 Slots, automatically piloted.	300
Hover-Truck: 6 slots, requires driver.	1,000
Overland Trawler: 10 slots, requires driver, slow. Compartment for sleeping.	3,000

FOOD, DRINKS, & SERVICES	COST
Cantina Meal (Poor): Synth-protein hash, nutrient rations, suspicious looking specials.	5
Cantina Meal (Good): Mostly real clone meat, hydroponic vegetables, local crop.	15
Cantina Meal (Excellent): Imported organic cuts of meat, cheeses, quality fruits.	40
Alcohol (Poor): Swill. Will get you drunk.	5
Alcohol (Good): Decent local brews, synthetic liquors, staple brands.	15
Alcohol (Excellent): Real aged liquors, organic ingredients, no fillers.	30
Cheap Motel (Minimal fleas, occasional gunshots)	10
Quality Lodging (Free meal provided)	20
Back-Alley Doctor (Recover from wounds/ability score damage in 5 days)	50
Hospital (Recover from wounds/ability score damage in 3 days)	100
Specialist Medicine/Surgery (Recover from serious wounds/ability score damage in 1 day, additional fees may be required)	200
Legal Entertainment (VR Arcade/Live Music/Arena Fights) Clears 1D4 fatigue.	50
Local Transit (Taxi/Train/Etc.) Travel inside a city or settlement.	20
Inter-System Transit: (Shuttles) Travel across a star system; planets, moons, stations.	100

SPECIALISTS (COST IS DAILY)	COST
Tracker or Guide	50
Scientist or Medical Doctor	100
Engineer or Technician	75
Starship Pilot	75
Archaeologist or Historian	75
Smuggler or Criminal Expert	100
Computers/AI Expert	100

CORE RULES

ABILITY SCORES

Each of the three abilities are used in different circumstances.

- › **Strength (STR)** Used for saves requiring physical power, like lifting heavy things, bending or breaking, resisting poison, endurance, stamina, etc.
- › **Dexterity (DEX)** Used for saves requiring speed, reflexes, agility, and poise, like dodging, sneaking, climbing, balancing, using complex tech, etc.
- › **Willpower (WIL)** Used for saves to persuade, deceive, interrogate, intimidate, charm, provoke, manipulate alien technology, navigate star charts, harness psionics, etc.

SAVES

A save is a roll to avoid bad outcomes from risky choices and circumstances. PCs roll a d20 for an appropriate ability score. If they roll equal to or under that ability score, they pass. Otherwise, they fail. A 1 is always a success, and a 20 is always a failure. Many risks that call for a save bypass HP altogether. Communicate the risk clearly to your players if they have a chance to decide on a different course of action. If there is a contested action, the party at most risk makes the save.

Opposed Saves: Both parties roll and the highest successful save wins.

LUCK

Sometimes you just need to let the fates decide on an outcome. If you don't know about if something should be a save, or you don't quite know how to calculate if something is good or bad, roll a d6. On a 1 the result is unfavorable, 2-3 the result is mixed or uncertain, 4-5 is normal, 6 is favorable.

ADVANTAGE & DISADVANTAGE

When a character has some sort of leverage or is at some sort of handicap, and a save is required, give them enhanced success or reduced failure for **ADV** and mixed success or disastrous failure for **DIS**.

INVENTORY

Characters have a total of 10 inventory slots: a backpack with six slots, and four slots for their body (such as carried weapons, chest, legs, feet, head, etc.)

Anyone carrying a full inventory (e.g. filling all 10 slots) is reduced to 0 HP.

Most items take up one slot, and small items may sometimes be bundled together. Slots are abstract and can be rearranged per the GM's discretion.

- › **Bulky** items take up two slots and are typically two-handed or awkward to carry.
- › **Heavy** items and weapons can only be used *or* moved within one round.
- › **Unwieldy** items cannot be carried by one person or in your inventory. Additional means of transportation must be conceived.

A PC cannot carry more items than their inventory allows. Carriers (which must be controlled with both hands), vehicles, droids, or pack animals can increase inventory. Hired mercenaries can also be paid to carry equipment and also have 10 slots.

TASK RESOLUTION

When a player attempts to do something such as pick a lock, drive a speeder, or hack a computer, three task resolution factors should be taken into consideration: training, tools, and time.

If a player has all three: training (inferred from background, a skill, etc.), appropriate tools (an item), and enough time (usually 10 mins), they will always succeed.

If a player is missing one of the above, a Save might be appropriate, with a failed save resulting in a consequence, such as getting caught, breaking the tool, or not being able to solve the problem.

If a player is missing two of the above, it is usually impossible to resolve the task at hand, or the results of failing a Save could potentially be very dangerous.

HEALING

Resting for a few moments and having a drink of water restores lost HP but leaves the party exposed. Ability score loss (see Critical Damage) can usually be restored by recuperating for a few days facilitated by a medic, doctor, ship med-bay, or other appropriate source of expertise. Some of these services are cheap, while experts, unusual services, or more expedient means of recovery may come at a higher cost or favor.

DEPRIVATION & FATIGUE

A PC **deprived** of a crucial need (such as food, warmth, or rest) is unable to recover HP or ability scores. Anyone deprived for more than a day adds fatigue to their inventory, one for each day. You can also gain **fatigue** in other ways during play such as from ability use and specific events. Each fatigue occupies one slot and lasts until they are able to recuperate (such as a full night's rest in a safe spot).

CONDITIONS

Conditions occupy inventory just like fatigue, but have other effects and unique recovery conditions.

ARMOR

Before calculating damage to HP, subtract the target's armor value from the result of damage rolls. No one can have more than 3 points of armor.

Worn armor is usually listed as Armor 1, Armor 2, etc. and will usually only benefit from a secondary armor source if it is bonus (+1 Armor) or it makes sense fictionally.

Shields and similar items provide bonus defense (e.g. +1 armor), but only while the item is held or worn.

SHIELD SHORTING

Players can opt to absorb all of the damage from one attack in exchange for their shield generator being destroyed.

COST OF LIVING

PCs can rest on their ship (for free) or at paid lodgings, and will recover from most minor and moderate wounds after 7 days of rest. If players don't sleep in a dedicated sleeping location, they will be deprived until they are properly rested.

WEALTH & TREASURE

The most common currency is the galactic credit (cred or C). Regional currencies may exist and have an exchange rate. Some systems might only take a certain currency depending on their government and territory.

Treasures are highly valuable items or goods, usually bulky, and rarely useful beyond their value. Treasure can be a lure, taking PCs to exotic and even dangerous locations, and is often under the protection of intimidating foes. Space stations, trade ports, and planetary cities barter and trade based on the local rarity and value of an item or commodity.

FREELANCERS & MERCS

PCs can hire freelancers and mercenaries to help on missions or with other work. To create a freelancer, roll 3D6 for each ability score, then give them 1D6 HP and a standard weapon (D6), then roll on the Finishing Touches tables to further flesh them out. Freelancers cost between 50–100 credits per day, or a share of whatever rewards the party obtains. After a freelancer completes a mission they can be taken on as a crew member and gain levels like the PCs. From then on they will always take an equal share of pay.

TAGS

Tags are optional, simple descriptors that state truths about a character. They don't offer direct mechanical bonuses, but can be used as a tool when negotiating between the player and the GM, or deciding an outcome.

Backgrounds also imply a non-specified amount of traits, skills, knowledge, or training and can also be leveraged as such.

Character qualities and skills may be listed explicitly as tags, such as [Technical Savvy] for an Engineer background. A PC could also spend a significant amount of time or money training (or via similar means) to learn various skills. Using tags can be a helpful way to help organize a character's acquired knowledge and expertise.

As characters interact with the setting, they will acquire more capabilities, and more truths about their character will be defined, either as tags, or recorded as notes on the character sheet.

EXPERIENCE POINTS

Experience points (XP) is gained from credits recovered (returned to a "safe" location). XP from treasure must be acquired by finding a buyer for the treasure. XP can also be gained from carousing (pg. 52-53)

LEVELING UP

Re-roll all three of your ability scores. If the new result is higher, increase that score by 1. Roll 1d6 and add to HP total. Each time you level up, reset XP to zero.

Optional Adjustments

- › Adjust HP gain to 1D4 for a slightly slower progression.
- › Adjust HP gain to gain +1 for rolling over current HP with a 3D6 roll for a more consistent, but even slower progression.
- › For slower leveling, simply adjust the experience needed to start with 1,000 and either add +1,000 each level, or double it every level.

Experience Needed Per Level	
2	1,000
3	1,500
4	2,000
5	2,500
6	3,000
7+	+500 to previous requirement

ADVANCEMENT NOTES

- › The maximum value any ability score or hit protection can reach is 18.
- › Players may acquire special abilities or advanced capabilities by training with experts, augmenting their mind via technology or strange artifacts, or through intense experiences. (see Talents, pg. 80)

REACTION ROLL

When the PCs encounter an NPC whose reaction to the party is not obvious, the GM may roll 2d6 and consult the following table:

2	3-5	6-8	9-11	12
Hostile	Wary	Curious	Friendly	Helpful

NPC WANTS

NPCs always have desires and ongoing goals. Use this roll to help determine what those might be. Hostile NPCs will usually make demands. Friendly NPCs might be open to bargains or favors. Sometimes NPCs and monsters will be able to give you information about the location you're in, and might even offer their services as mercenaries.

D10	Want	Description
1	Food	You can distract them with rations, point them towards corpses, cast a food illusion.
2	Aid	They could be hurt and need medical aid.
3	Money	They want money. Extortion, toll, tax, tribute, or greed.
4	Valuables	Rare or unique items. Excellent pairings can result in their friendship as allies.
5	Territory	This is their turf. They will defend it, ask you to leave, or to prove why you should be able to pass through.
6	Info	They want to know about a faction, nearby NPC, landmark, or location.
7	Help	They need something from nearby, probably somewhere dangerous. Kill someone, clear an area out, retrieve something.
8	Trade	They have random equipment (from each category on equipment tables) and want to trade or sell. 1 in 6 chance they have something rare or valuable. Good business means possible friendship.
9	Mission	They're in service to another nearby NPC and are helping that NPC achieve a goal.
10	Directions	They are lost and need directions somewhere or help being escorted there safely.

COMBAT RULES

START OF COMBAT

At the Start of Combat, each PC must make a DEX Save for a chance to act before their adversaries. If PCs fail their DEX Save, they don't act in the first turn. Subsequent rounds will always go PC Turn, then Enemy Turn.

If one side is surprised or ambushed, they automatically go second at the start of combat.

ROUNDS

The game typically plays without strict time accounting. In a fight or circumstance where timing is helpful, use rounds to keep track of when something occurs. A round is roughly ten seconds of in-game time and consists of turns.

TURNS

- Each round, PCs all act together on the PC turn, and enemies all act together on the enemy turn. The only exception to this is the start of combat, where passing a DEX Save allows PCs to act before the enemy turn.
- The GM should telegraph the most likely actions taken by NPCs or monsters.

ACTIONS

On the PC's turn, each character may move up to 40ft and take up to one action. This could be attacking, using a power or item, moving another 40ft, or some other reasonable action.

Each round, the PCs declare what they are doing before dice are rolled. If a character attempts something risky, the GM calls for a save for appropriate players or NPCs.

ATTACKING & DAMAGE

The attacker rolls their weapon's damage dice and subtracts the target's armor, then deals the remaining total to their opponent's HP. Any damage that exceeds HP is dealt to STR (see Critical Damage.) When an attack reduces a PC's HP to exactly 0, they gain a scar (see Scars).

ATTACK MODIFIERS

- If fighting from a position of weakness (such as through cover or with bound hands), the attack is **impaired** and the attacker must roll 1d4 damage regardless of the attack's damage die.
- If fighting from a position of advantage (such as against a helpless foe or through a daring maneuver), the attack is **enhanced**, allowing the attacker to roll 1d12 damage instead of their normal die.
- Certain advantageous situations or tools might call for enhanced damage, or bonus damage. Use at your own discretion as a reward for clever planning.

BONUS DAMAGE

Under certain circumstances, an attack may receive a bonus, noted as +D6, +D8 etc. This is rolled as an extra attack against the same target, following the same rules as dual weapons. Remember that only the highest single die result causes damage. Attacks against a completely helpless target always receive +d12.

MULTIPLE ATTACKERS

If multiple attackers target the same foe, roll all damage dice and keep the single highest result each round.

DUAL WEAPONS

If attacking with two weapons at the same time, roll both damage dice and keep the single highest result each round.

BLAST DAMAGE

Attacks with the blast quality affect all targets in the noted area, rolling separately for each affected character. Blast refers to anything from explosions to huge cleaving onslaughts to the impact of a meteorite. If unsure how many targets can be affected, roll the related damage die for a result.

CRITICAL DAMAGE

Damage that reduces a target's HP below zero decreases a target's STR by the amount remaining. They must then make a STR save to avoid critical damage. Additionally, some enemies will have special abilities or effects that are triggered when their target fails a critical damage save. Rare or exceptional items and abilities may also give PCs special effects on crits.

Any PC that suffers critical damage cannot do anything but crawl weakly, grasping for life. If given aid and rest, they will stabilize. If left untreated, they die within the hour.

WEAPON RANGES

Weapons have one or more ranges for their optimal use. Any time a weapon is used a single increment outside of its listed range, the damage is impaired. A weapon cannot be used more than one increment outside of its range. Range descriptions are rough estimates. If a weapon in the armory doesn't list a range, make a call based on what seems appropriate.

- › **Close (C-R):** Within melee & touch range.
- › **Short (S-R):** In the same room.
- › **Mid (M-R):** Across a yard or down a street.
- › **Long (F-R):** Across a field or city block.

ABILITY SCORE LOSS

If a PC's STR is reduced to 0, they die. If their DEX is reduced to 0, they are paralyzed. If their WIL is reduced to 0, they are delirious or catatonic. Complete DEX or WIL loss renders the character unable to act until they are restored through extended rest or by extraordinary means.

CHARACTER DEATH

When a character dies, the player is free to create a new character or take control of a mercenary. They immediately join the party in order to reduce downtime.

DETACHMENTS

Large groups of similar combatants fighting together are treated as a single detachment. When a detachment takes critical damage, it is routed or significantly weakened. When it reaches 0 STR, it is destroyed.

- › Attacks against detachments by individuals are impaired (excluding blast damage).
- › Attacks against individuals by detachments are enhanced and deal blast damage.

MORALE CHECKS

Enemies must pass a WIL save to avoid fleeing when they take their first casualty and again when they lose half their number. Some groups may use their leader's WIL in place of their own. Lone foes must save when they're reduced to 0 HP. Morale does not affect PCs.

RETREAT

Running away from a dire situation always requires a successful DEX save, as well as a safe destination to run to.

ADVANCED WEAPONRY RULES

RANGED PROPERTIES

- › **Cheap:** Roll a D6 after any combat encounter, or as fiction might dictate. A roll of 1 and it breaks.
- › **Armor Piercing (AP):** Ignore all armor (damage rolls of 1 misfire)
- › **Exploding:** Re-roll max damage dice and add to total.
- › **Spec Ammo:** Special ammo, charge, or fuel. Max damage rolls require spending a turn reloading/refueling and consume a unit of spec ammo from your inventory.
- › **Overclocked:** On max damage, upgrade dice type. 6>8>10. 10 on a d10 will reset the weapon to its base dice and the weapon will need 2d6 hours to recharge. Can manually re-set the battery outside of combat for 1d6 hours recharge.

MELEE PROPERTIES

- › **Parry:** Melee attacks of 2 damage or less are harmlessly parried away.
- › **Grapple:** (no damage) Entangle your opponent. They will need to pass a STR Save to break free.
- › **Sweep:** (Bulky) Long weapons that allow a second attack on an adjacent opponent.
- › **Brutal:** (Bulky) Big enough to instantly kill an opponent on max damage and force a morale check on the target's allies.
- › **Vorpal:** (Small Blades) Damage immediately bypasses HP, going straight to STR and requiring a save against Critical Damage. Typically illegal.
- › **Deadly:** (Small or Medium Blades) Deadly weapons are fast enough to roll again on max damage and add to total.

DAMAGE TYPES

- › **Thermal:** DEX Save or take 1D4 heat damage for 1D4 rounds.
- › **Cryo:** STR Save or do half damage on next attack.
- › **Shock:** DEX Save or lose turn for 1 round.
- › **EMP:** (Only effective vs machines) STR save or lose turn for 1 round.
- › **Biological:** (Only effective vs organics) STR save or 1D4 damage for 1D4 rounds.
- › **Serrating:** (Only effective vs organics) STR Save or 1D4 damage for 1D4 rounds.
- › **Sonic:** (Only effective vs organics) WIL Save or lose turn for 1 round.
- › **Disintegration:** DEX Save vs instant obliteration. Usually illegal.

SMART WEAPONS

Smart weapons fire A.I. guided rounds. Roll the two dice indicated and take only the highest single result. Must have smart weapon ammo in your inventory to use smart weapons.

- › When you roll doubles, no damage and the weapon glitches. You must spend the next round recalibrating.

HIGH-ENERGY WEAPONS

These weapons do higher damage at the risk of possible malfunction. Roll 2 damage dice instead of one (example, 2d6) and the total is combined. High-energy weapons cannot have other properties.

- › When you roll doubles, no damage and the weapon overheats. You must spend the next round venting heat.
- › When you roll max (on either dice) you must spend the next round reloading. This requires ammo in your inventory.
- › High-energy ammo can be bundled in stacks of 3.

SCARS

When an attack reduces a PC’s HP to exactly 0, they are uniquely impacted. Look up the result on the table below based on the total damage taken.

Scars Table	
1	Scarred: A part of you is violently marked. Roll 1D6 — 1: Eye, 2: Face, 3: Neck, 4: Chest, 5: Hands, 6: Ear Roll 1D6. If the total is higher than your max HP, take the new result.
2	Shaken: You’re disoriented from a thunderous blow. After you take something to calm your nerves, roll 1D6. If the total is higher than your max HP, take the new result.
3	Walloped: You’re sent flying from impact, and land in a heap. You are deprived until you rest for a few hours, then roll 1D4 and add that amount to your max HP.
4	Broken Bones: Roll 1D6 1-2: Leg, 3-4: Arm, 5: Ribs, 6: Skull. Once healed, roll 2D6 against your maximum HP. If higher, take the new result.
5	Bloody Mess: You are deprived until you see a specialist for a lot of stitches. Once you do, roll 2D6 and compare to your maximum HP. Keep the results if higher.
6	Scrambled Head: Roll 1D6 1-2: STR, 3-4: DEX, 5-6: WIL. Roll 3D6 against the consequent attribute. If higher, take the new result.
7	System Shock: You can barely move until you get medical attention. After recovering, roll 3D6. If the total is higher than your max DEX, take the new result.
8	To Shreds, You Say?: Roll 1D6 1: Leg, 2: Arm, 3-4: Hand, 5: Jaw, 6: Eye. The body part is torn off. Make a WIL save. If you pass, increase your max STR by 1D4.
9	Only Mostly Dead: That was harrowing. You are deprived until you get specialized treatment. Once healed, make a will save. If you pass, increase your max WIL by 1D4.
10	Mortal Wound: You are deprived and out of action. You die in one hour unless healed. Upon recovery, make a will save. If you pass, increase your max HP by 1D6
11	Cerebral Reorientation: You are knocked unconscious and need to see a specialist within 24 hrs for a week of healing. You feel like a slightly different person. Re-roll your WIL on 3D6.
12	Doomed: If your next save against critical damage is a fail, you die horribly. If you pass, roll 3D6. If the total is higher than your max HP, take the new result.

CAROUSING

You can spend your credits on experiences rather than on things. Carousing lets you double-dip your XP gained at a 1-to-1 ratio by “wasting” it on carousing, partying, and having a good time. For each credit you spend carousing, you gain 1 XP. Roll 2D6 to see what happens during carousing. If players roll a mishap or fortune, roll 1D12 on the appropriate table.

D12	MISHAP
1	Brawl. You all are involved in a brawl that gets out of control. Start the next adventure with a black eye and -1 HP per level. The local cantina owner is no longer quite as friendly.
2	Minor misunderstanding with local authorities that you're unable to smooth over. You all spend the next 1d6 days in jail. Now seen as local troublemakers.
3	One of you insulted a local person of rank. They will hold a grudge unless you all publicly apologize and humiliate yourself before them.
4	Brutal hangover. The first 2d6 hours adventuring the next day are done with disadvantage to all STR saves.
5	Gambling binge. Your party owe a collective debt equal to roughly half the amount spent carousing to someone you'd rather not own money to.
6	You've ruined the local economy! Your excess spending means that all prices are now doubled until the next session.
7	Major misunderstanding with the local authorities. All equipment is confiscated until fines and bribes totaling 1d6 x 100 credits are paid.
8	While in a drunken stupor and a spot of trouble, you sought refuge in a temple (or with another faction). They took care of you but now as repayment have begun hounding you to perform a charitable act (or other favor).
9	Bad investment. Invest with a roll of d66% of your available creds in some smooth-tongued merchant's scheme. Turns out it's a sham and they've gotten away.
10	Due to a streak of bad luck while gambling and some antagonistic remarks, you made bitter enemies with a local rival adventuring party or criminal element.
11	Beaten and robbed. You are waylaid by a bunch of thugs during your drunken carousing. Lose d100% of your available creds.
12	Everything is on fire! Accidentally start a conflagration Roll 1d6 twice, (1-2) burn down your favorite place, (3-5) some other den of ill repute is reduced to ash, (6) a big chunk of town goes up in smoke. (1-2) no one knows it was you guys, (3-5) one other person knows you did it, (6) everybody knows.

2D6 CAROUSING RESULTS

- | | |
|-------|---|
| 2-5 | Mishap! Experience is gained, but something has gone wrong or you've made fools of yourself in some manner. Roll on the carousing mishaps table. |
| 6-9 | Experience is gained without incident. |
| 10-12 | Fortune! Experience is gained. You've all had a stroke of good fortune! Roll on the carousing fortunes table! |

FORTUNE

Jackpot! One of you strikes it rich at the gambling tables! Gain level x 200 credits.

Gain a local reputation as the **life of the party!** Those of ill repute are much more friendly and see you as one of their own.

What was in that stuff? That strange powder you snorted revealed mystic truths about the universe. Young people in the settlement see you as cool and not one of the squares. Optional: Gain a random power or mutation.

Well fed, well rested, and ready to go! The next day of adventuring you start with 1D6 bonus HP (doesn't return after rest) your first save automatically succeeds.

Citizens arrest! You catch some criminal in the act and are able to restrain them until the authorities arrive. You are seen as heroes by the settlement for a short time.

Due to your **influx of cash**, the local weapons or augmentations dealer has been able to order an exquisite weapon that he's willing to sell to you for a reduced price.

The local cultural or religious leaders see you guys as protectors of the settlement. They offer you a blessing before your next adventure.

Impressed by your ability to drink for days and keep standing, a freelancer of high repute is willing to join you on your next adventure if you wish, at no initial cost.

Killer investment! Invest all your spare cash in some smooth-tongued merchant's scheme. Turns out it's real! It returns 50% profits next session.

Local celebrity. Your ability to carouse with the common folk has led them to see you as one of their own. The locals are thankful to have you around. You receive free room and board in this settlement of modest quality and possibly some new connections.

Hot Goss. Your time spent carousing has let you in on some juicy gossip. You learn one major secret about a person in authority.

Heroic Carousing! It was a night of truly epic debauchery. Everyone roll a d6 to see how your legend grew. (1) Re-roll HP for your level, take the new result if higher, increase by 1 if result is lower. (2) Gain 1 STR, (3) Gain 1 DEX, (4) Gain 1 WIL, (5) Gain a random Astromancy, (6) Gain Ld6 x 100 creds.

TACTICAL PROCEDURES

URNS

- › When exploring a dangerous location such as an ancient ruin, derelict starship, or other adventure site, GMs have the option of using turns.
- › Each turn is roughly **10 minutes** (10 combat rounds equal 1 exploration turn).
- › If you're mapping on a grid, use **10-foot squares**.

TACTICAL MOVEMENT

- › Characters can **carefully explore about 120 feet** (3-times their combat movement of 40) per turn. This accounts for moving at a quiet pace, mapping progress, and checking for traps, hazards, and secrets. They will spot most traps and clues at this pace.
- › Characters can **quickly explore about 240 feet** per turn. Players moving quickly may get a chance to roll under WIL to notice dangers, otherwise they may trigger any hidden trap (2-in-6).
- › Characters can **move recklessly about 600 feet** per turn. Characters running at a full sprint will see no signs of danger and their chance of triggering a hidden trap increases to 4-in-6.

TRAPS & DANGERS

- › Traps should be designed to be disarmed or subverted with ingenuity and creative thinking using common sense and items, not skills and rolls. If you design an old-school trap, like a pressure plate with a 1 in 6 chance of discovering and 2 in 6 chance of triggering, make it more interesting than simply "gotcha" damage.
- › Consider what might make exploration more interesting. Could interacting with something open up a new area? Are there multiple factions at odds with each other the players can use strategically?

SEQUENCE OF PLAY

- 1. Encounter Roll:** GM makes encounter roll.
- 2. Actions:** The party decides what action to take (e.g. moving, searching, listening, entering or exiting rooms).
- 3. Description:** GM describes what happens. If encounters were rolled, they happen here. If (1) was rolled on the encounter die, follow the subsequent procedures:
 - › Roll 3d6 x 10 to determine how far the NPCs are, distance is in feet.
 - › Roll for NPC Reactions and NPC Wants.
 - › Have the PCs make DEX saves to determine start of combat, but don't engage in combat.
 - › **If NPCs go first**, determine if they will attack, wait, or do something else based on their reaction and wants.
 - › **If PCs are first**, determine if they will attack or wait. If PCs ask to gauge the NPCs disposition out of an interest to negotiate or talk, be honest with them if it's obvious.
- 4. End of turn:** Update time. Manage light, food, need to rest, or any item usage and tracking.

ENCOUNTER ROLL

Roll a d6 encounter dice every 3 turns. Deadlier dungeons can be rolled every 2 turns. Only a roll of 1 will result in an encounter, and they won't always be hostile.

1. **Encounter:** Roll on an encounter table, then roll for NPC Reaction and NPC Wants.
2. **Sign:** Clue, track, abandoned lair, scent, victim, droppings, etc. On the next Encounter Roll, consider encountering whatever left the sign if applicable.
3. **Locality:** Context-dependent timer, water rising, ritual completing, environmental occurrence.
4. **Exhaustion:** Rest next turn or deprived.
5. **Expiration:** Resource expires, ongoing effects end, light usage devices glitch or fail, bellies rumble.
6. **Discovery or Treasure:** Players find valuable information, location knowledge, hidden feature, or loot.

SEARCHING

- › A quick search takes 1 minute, covers roughly a 30x30' space, and reveals only the most obvious information.
- › A detailed search takes 10 minutes (1 round), covers roughly a 30x30' space, and reveals all hidden information.
- › If players state they're searching in the exact spot of a hidden feature, or are interacting specifically with a hidden mechanism, they will succeed.

LIGHT

- › Lanterns, glo-torches, and other radial sources of light illuminate 40' clearly and provide dim outlines and shadows for a further 40'.
- › Flashlights have a range of about 80' clearly and another 40' dimly, but only a width of a few feet.
- › In the dark, light sources are visible miles away.

TREASURE & LOOT

Most treasure should be more valuable than it is useful. It should generally be hard to acquire, big, heavy, and useless beyond its value. Make it something someone other than the players wants. If they don't have a buyer or someone who hired them to find it, they should be encouraged to go out and see who might want to buy it. Players can also loot cred sticks, weapons, armor, items, and various powerful artifacts and technology. Maps to other locations and valuable information are also great sources of loot.

OTHER ACTIONS

All of these actions will typically take one turn.

- › Hacking
- › Lock-picking
- › Forcing a door
- › Disabling traps
- › Clearing an obstacle
- › Deciphering symbols & languages
- › Setting up traps
- › Looking through a book
- › Sorting through items

HEXCRAWL TRAVEL

HEX CRAWLING

Each hex represents 6 miles. An adventuring day is divided into 6 turns of approximately 4 hours each. Two of these phases, approximately 8 hours, must be spent sleeping in order to avoid becoming deprived. In each turn, the following procedure is followed:

1. **Action:** The party decides on one action for that turn.
2. **Event Roll:** The GM rolls on the event dice for encounters and other random events.
3. **Resolve:** The action and event rolls are resolved.

EVENT ROLL

The GM rolls 1d6 and consults the table appropriate to the party's location.

1. **Encounter:** Roll on an encounter table for that terrain type or location.
2. **Sign:** Clue, spoor, or indication of nearby encounter, locality, hidden feature, or information about a nearby hex.
3. **Locality:** Shifts in weather, terrain, or other local changes.
4. **Expiration:** Exhaustion (Rest this turn or add 1 fatigue), Hunger (Eat a ration or add 1 fatigue), or another resource is needed.
5. **Discovery:** Discover something useful such as food, treasure, or other resources.
6. **Hidden Feature:** The main feature of the hex is discovered, or, choose or roll randomly for a unique hex feature from a random table. Options could be small dungeons, secret areas, factions, special items, etc. If the hex doesn't have a hidden feature, consider an additional discovery and be clear that the hex has been fully explored.

EXPLORATION ACTIONS

The party may engage in one of the following standard actions each turn:

- › **Travel:** Passing through a hex and into an adjacent one. On roads marked on the map, the party travels through two hexes (three if mounted). Off-road, one hex is traversed. There is also a 2-in-6 chance, when traveling off-road, of getting lost. This is increased to 3-in-6 in hexes classified as difficult terrain. An experienced survivalist decreases the chance of getting lost by 1-in-6. If lost, PCs will need to spend the next turn using the "search" action to reorient themselves. The effects of getting lost are rolling a D6, assigning a number to each side of the hex, and moving the players one hex off course in that direction.
- › **Explore:** Looking for interesting features within a hex. There is a 4-in-6 chance of discovering the hidden location in the hex description. Difficult terrain reduces this to 3-in-6. An experienced explorer increases the chance by 1-in-6.
- › **Search:** Looking for something which was previously encountered in a hex. The basic chance is 5-in-6 or 4-in-6 in difficult terrain. An experienced woodsman, tracker, or navigator increases the chance by 1-in-6.
- › **Interact:** Staying in the current location (e.g. exploring a dungeon, town, etc).
- › **Camp:** Resting and/or sleeping.
- › **Forage:** Hunt, fish, or forage for food. There is a basic 3-in-6 chance of success. An experienced hunter, angler, or woodsman increases the chance.

POINTCRAWL TRAVEL

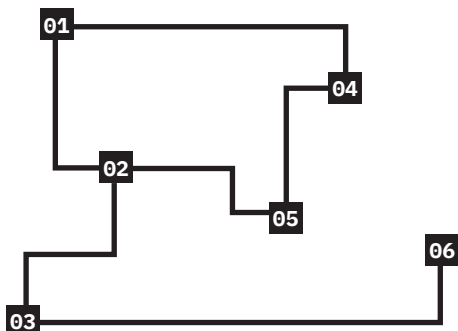

POINT CRAWLING

Points of Interest (POIs) are marked as locations on the map with a number. Point of interest can range from settlements, ruins, natural landmarks, or anything that has content for players to interact with. Lines of travel between POIs indicate routes or paths. The time and length of a path is different, depending on distance, terrain, and other factors.

ROUTES

Routes between two points are designated by their two labels (e.g. **01/04** is the route between points 01 and 04.) Typically they are the same both directions, but in cases where one direction might be different (such as uphill, upriver, etc.) label it **01 to 04** to indicate direction.

- Routes will indicate travel time, encounters, hazards, and any other particulars.
- Encounters can include creatures, NPCs, shifts in weather or terrain, exhaustion, requiring resource expenditure, discovery, and even finding treasure.
- The time a route takes to travel is a combination of both distance and difficulty or quality of terrain.
- A route that appears shorter than another might take longer to traverse because of difficult terrain or other factors.

MOVEMENT ACTIONS

- Travel:** Move through an available route from your current point to another connected point. Refer to the route entry for details on travel time and hazards. Roll on the encounter table for that route.
- Camp:** Make camp and rest for 8 hours.
- Forage:** Hunt, fish, or forage for food. Every attempt takes 1 hour. There is a base line 3-in-6 chance of success. An experienced hunter, angler, or woodsman increases the chance.

SURVIVAL

- Players must spend roughly 8 hours every 24 hours resting or become deprived.
- Players will need to eat 1 ration (or equivalent) every 24 hours or become deprived.

EXAMPLE ROUTE 01/04

- Travel Time:** 4 hours
- Distance:** ~8 miles
- Terrain:** Forest and plains mix. Rocky but level. Small streams and brooks.

Encounters (01/04)	
1	2D4 Blue Jackals (3 HP, 6 STR, 12 DEX, D6 Bite)
2	Thunderstorm (+1 fatigue to push through or double your travel time)
3-5	No encounter
6	Discover 3 sweetgrass (ration, can bundle)

STARSHIPS

STARSHIP SCORES

- › **Shields (SHI)** Shields of energy protect the hull of the ship from structural damage. They take 10 mins to recharge after combat.
- › **Hull (HUL)** The hull of the ship is the structural integrity and outer physical layer.
- › **Engines (ENG)** Engines power the ship by providing it with energy.
- › **Systems (SYS)** Systems are the quality of the ship's wiring and technological capability.

HOLDS

- › Holds are a ship's inventory capabilities.
- › Most **starship parts** occupy 1 hold. Bulky parts occupy 2 hold.
- › A hold can contain quarters (rooms), modules, or a single unit of trade goods.
- › A ship's size determines how many holds it has.

QUARTERS

Quarters are rooms or areas on the ship. All ships will have a cockpit or bridge by default, along with anything else specified.

MODULES

Modules add features or increase Starship Scores. Modules can be weapons, technology, improvements to shields, armoring, hull, engines, and systems. Modules can stack.

ARMORING

Before calculating damage to SHI, subtract the target's armoring value from the result of damage rolls. No ship can have more than 3 armor.

MOVEMENT & MOBILITY

- › Movement is the amount of hexes a ship may move during their turn in combat. Ships may change their direction using one point of movement.
- › Mobility is the amount of directions on a hex they may rotate using one unit of movement. One point of mobility allows a ship to rotate for 60 degrees

CREW REQUIREMENT

Minimum individuals required to operate the ship, maximum capacity. Ship size lists a range from minimum crew needed for operation, all the way to maximum capacity.

CREW MATES

Ships require a crew to operate. Hire a crew mate for 50C a week. They will live on and help operate the ship. If they need to be interacted with individually, they will have Attribute Scores of 10 and 3 HP. If crew mates come on missions, treat them as freelancers.

BUILDING & UPGRADING

- › A ship will cost 500C for each Hold. Determine the size of ship you are creating based on Holds and assign a price. (e.g. a Medium Ship will have a base cost of 6,000C.)
- › Any other modules or quarters will increase the ship's price based on cost of parts.
- › You cannot buy individual holds. A ship must be upgraded in size which takes 1D6 days and has a labor cost of 100C a day. Upgrading a ship's size also has an additional cost of 2,000C, which is the value of the increase in holds (increments of 4).

SHIP SIZE

Starships come in 5 Sizes (Fighter, Small, Medium, Large, Giant). Each size has a fixed number of holds, which will determine capacity for ship upgrades and cargo.

- All ships start with Starship Scores of 10. Add modules to upgrade their scores.
- All ships come with a cockpit (Fighter-Medium) or bridge (Large & Giant). Doesn't fill a Hold.
- All ships come with an engine room (Fighters just have an engine.) Doesn't fill a Hold.
- All ships come freely equipped with an Unstable Shield Gen (1 Hold) and a Flak Cannon (1 Hold).
- Some starship parts can only fit certain ship sizes (use your judgement), or have minimum Ship Score requirements.

FIGHTER (1-2 Crew)		
MOVEMENT	MOBILITY	HOLDS
5	3	4

SMALL (2-6 Crew)		
MOVEMENT	MOBILITY	HOLDS
5	2	8

MEDIUM (6-10 Crew)		
MOVEMENT	MOBILITY	HOLDS
4	2	12

LARGE (10-20 Crew)		
MOVEMENT	MOBILITY	HOLDS
3	1	16

GIANT (20-50 Crew)		
MOVEMENT	MOBILITY	HOLDS
2	1	20

SAMPLE STARSHIP

The Desdemona

Medium Ship

Shields: 1D6 (Roll on recharge)

HUL: 12

ENG: 10 (+4 Energy Reserves)

SYS: 14

Armoring: 1

Movement: 4

Mobility: 2

Holds: 12

1. Flak Cannon (D4)
2. Unstable Shield-Gen (Roll 1D6 on recharge)
3. EMP Rockets (D8 to SHI only)
4. Afterburners
5. Power Reserve (+4 Energy Reserves)
6. Crew Quarters
7. Mess Hall
8. Reinforced Plating (+2 HUL)
9. Nano-Relays (+4 SYS)
10. Omni-Gel Coating (+1 Armoring)
11. Empty
12. Empty

STARSHIP COMBAT

START OF COMBAT

At the Start of Combat, and each subsequent round, the pilot makes a DEX Save to act first.

DEPARTMENT PHASES

On each round, every department will get to perform a department action if at least one player is operating that department. The departments are Pilot, Engineering, Weapons, Systems, and Command. These phase can happen in any order and all occur simultaneously during the player turn.

FACING

Unless otherwise noted, attacks from behind go up one dice size, and from head-on they go down one dice size.

ATTACKING & DAMAGE

- Damage is first done to a ship's Shields, then the remaining damage is done to the Hull (see critical damage).
- Some weapons might have special properties or specific damage types, and some shields might specifically guard against that type of damage.

ATTACK MODIFIERS

- If fighting from a position of weakness (such as through cover, or with malfunctioning systems or weapons), the attack is impaired.
- If fighting from a position of advantage (such as against a malfunctioning ship or through a daring maneuver), the attack is enhanced.
- Certain advantageous situations or systems might call for enhanced damage or bonus dice. GM may use at their own discretion as a reward for players' clever thinking.

SHIP SIZE IN COMBAT

Fighter	Deals impaired damage to medium ships, attacks to larger ships are typically ignored.
Small	Deals impaired damage to large ships, attacks to giant ships are typically ignored.
Medium	Deals enhanced damage to fighters, and impaired damage to giant ships.
Large	Deals critical damage to fighters, deals enhanced damage to small ships.
Giant	Deals critical damage to fighters and small ships, and enhanced damage to medium ships.

PILOTING ACTION

The pilot may either move or perform a maneuver. Below is a list of piloting maneuvers.

- Spin:** Use half of your movement then attempt to turn up to 180 degrees. Make a DEX save, upon failure you don't make the spin.
- Evade:** Use half of your movement then attempt some tricky moves and rolls. Make a DEX save to impair damage taken that round.
- Flee:** Double your movement speed and don't make any weapon actions that turn. You may attempt to jump to hyperspace via a Systems Action after this maneuver.

ENGINEERING ACTION

The ship's engineer can boost other stations on the ship each turn.

If the ship has energy reserves, use those first and don't trigger an ENG Save. If no energy reserves are available, this action will reduce the ENG score by 1 and the ship must then make an ENG Save vs critical damage.

Engines that malfunction from a failed ENG Save can be repaired by a skilled mechanic outside of combat. Repairs take 1D6 hours for each point.

- › **Boost Piloting Station:** Pilot may take a second action.
- › **Boost Shields:** Restore 1D6 shields. Cannot be used on consecutive turns.
- › **Boost Weapons:** One weapon module may make two attacks and use the best result.
- › **Boost Systems:** Use two systems in one turn without needing to make a WIL Save.

WEAPONS ACTION

A PC operating the ship's weapons may choose a weapon module to operate and make an attack each turn.

- › **Switching Weapons:** Switching to a different weapon takes one turn. A character may attempt to change weapons and attack in the same turn by making a DEX Save. Failure results in being knocked down for 1D4 turns.
- › **Multiple Weapons:** Multiple PCs can operate different weapons if your ship has more than one. When multiple weapons are being used, only apply the highest result.

SYSTEMS ACTION

A system operator may activate a system module on their turn. Consult the particular system module to see the effect. Only one player may operate the ship's systems array. Attempting to use multiple systems in one turn requires a WIL Save from the operator, failure results in no systems being activated that turn and the operator taking fatigue.

COMMAND ACTION

Encourage another department for 1 fatigue. This allows one individual to attempt any single roll a second time and keep the result if it's better.

CRITICAL DAMAGE

Damage that reduces a starship's Shields below zero decreases a target's Score by the amount remaining based on damage type. The ship must then make a Save against the damage type dealt to avoid taking critical damage. Any starship that fails this save takes critical damage.

- › If a ship takes critical damage to the HUL, it is *breached*. 1D20 minutes before oxygen is depleted, which will result in death for organic beings.
- › If a ship takes critical damage to ENG, it *loses power* cannot do anything but drift helplessly and shield's won't recharge.
- › If a ship takes critical damage to SYS, all *systems malfunction* (including weapons and hyperdrive.)

If a starship continues to take damage and a Score is reduced to zero, see "Starship Score Loss" below.

Some modules may include special abilities or effects that are triggered when a target fails the critical damage save.

STARSHIP SCORE LOSS

- › If a ship's HUL is reduced to 0, it is *destroyed*. Vac-suits and escape pods on the ship may prevent anyone onboard from dying in space.
- › If a ship's ENG is reduced to 0, it is *junked*. Engines are totally destroyed. The ship cannot fly and will require replacement.
- › If a ship's SYS is reduced to 0, it is *fried*. All modules (including the hyperdrive) are inoperable. The ship's entire systems must be replaced.

REPAIRING DAMAGE

PCs may attempt to repair damage to Starship Scores. During combat, one attempt per Score may be made each round. If PCs have the appropriate tools (welding torch, engineering tools, electrical kit, etc.) and skill/training, they will repair 1D4 damage each round and deplete the tool. If a PC only has tools or skill, but not both, they must pass a WIL Save to figure it out. If multiple players attempt the same repair, only the highest result applies. Fully repairing damaged Scores will remove the effects critical damage.

SPACE TRAVEL

LOCAL TRAVEL

Starships traveling within a star system rely on ship thrusters. Travel between planets in a system takes about 1D6 hours on average.

LIGHTSPEED TRAVEL

Interstellar travel is accomplished via hyperdrive technology that allows starships to travel at faster-than-light speeds.

Complex calculations are made based on galactic mapping that can take anywhere from a few minutes to a few hours depending on the route and distance. Travel time is typically 1 day per hex. Adjust this if you want to suit your setting and its technology.

HYPERLANES

Routed lanes for hyperdrive travel. Hyperlanes are known coordinates a ship's navigation computer uses to plot routes. Ships can only travel to systems it has routes for. Space is big and you must have the coordinates to locate destinations.

HYPERDRIVES

Hyperdrives are onboard systems that allow for starships to make lightspeed jumps.

Hyperdrive travel still requires coordinates to either be calculated based on ship mapping of known systems, or manually entered by a trained navigator.

Hyperdrives are engineered as to not make jumps if calculations detect interference such as planetary bodies or other ships in the way.

FUEL

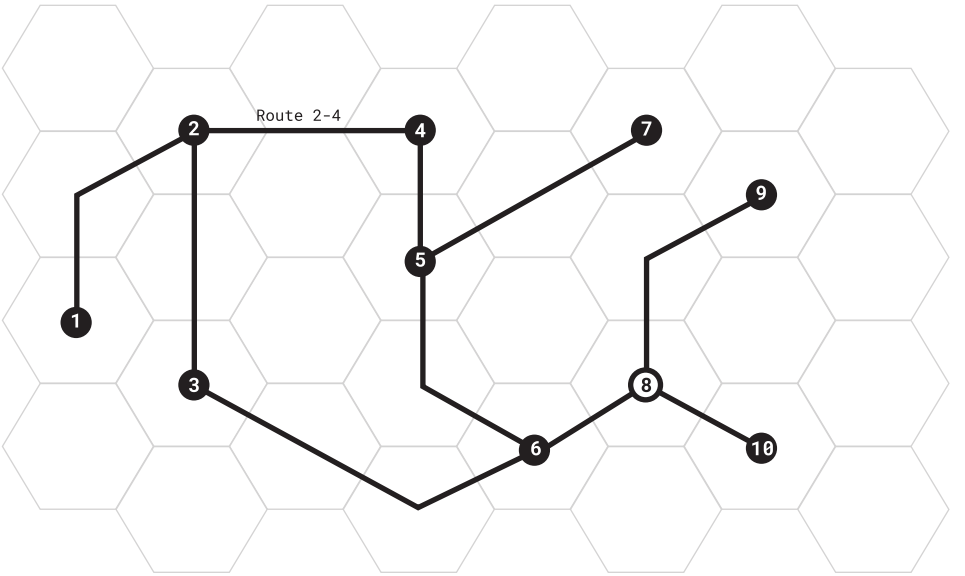

A tank of fuel is considered a trade good and occupies 1 hold. Each tank of fuel has 10 uses. Each lightspeed jump via a hyperlane takes 1 use of fuel. This is to account for the complex calculations involved in hyperspace travel. If players want to travel off lanes via hexes, each hex takes 1 use of fuel.

DOCKS & ORBITAL STATIONS

Most planets and moons will have dedicated docks for starships to land. Those that don't (due to limited space, environmental reasons, political reasons, etc.) will have orbital stations. These stations serve as hubs for starships to dock, refuel, and repair.

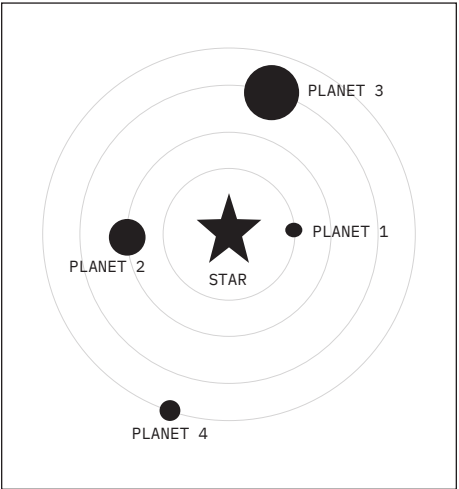

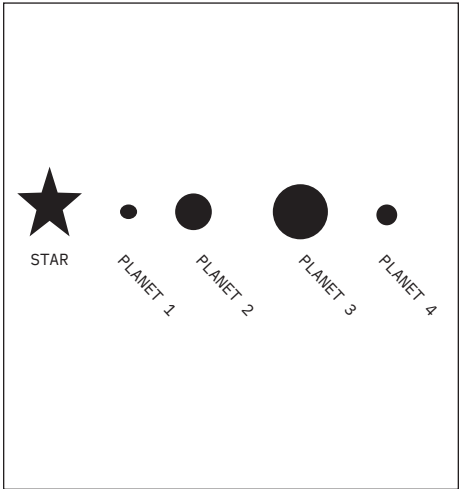

SAMPLE ASTRO-NAVIGATION CHART

The astro-navigation chart below shows the hyperlane routes this particular ship has plotted. The numbers are systems (or other locations) and the lines are the hyperlanes. Most space stations, major cities, and tech vendors will have nearby charts for sale if players want more direct routes to locations they frequent.

SAMPLE STAR SYSTEM

Each of the above points represents a star system (or other major point of interest.) Once at those “points”, the map view will zoom down into the next layer, which is usually the system view. Below is an example of a horizontal perspective and a top-down perspective.

STARSHIP PARTS

All starship parts listed here require a single hold (2 if listed as bulky.) If a part or starship component of some sort is not listed here, make a call regarding if it needs a hold to install or not, if it requires a certain starship score, the cost, and any other particulars about how it might be used. Weapons do damage to SHI and HUL unless otherwise specified.

WEAPON MODULES	COST
Flak Cannon (D4) Standard weapon, front-facing pilot use only.	Free
Auto-Gun (D6) Most common starship weaponry.	500
C-Beam (D8) Glittering azure particle beam.	1,000
Fusion Cutter (D8 to HUL, no damage to SHI)	750
EMP Rockets (D8 to SHI, no damage to HUL)	750
Hellfire Turret (D8) Critical Effect: Overheat (Engineer loses next turn.)	1,500
Storm Lance (D8, req ENG 12) Critical Effect: Fried Wires (System loses next turn.)	1,500
Quake-Ray (D6) Pilot must pass a WIL save or lose next turn.	1,500
Emerald Star Particle Array (D10, bulky) Brilliant green beams.	2,000
Ultra-Hot Chaingun (D10, bulky) Damage rolls above 5 ignore armoring.	3,000
Disintegrator Beam (D10, bulky, req SYS 12) Damage rolls above 7 go through SHI straight to HUL.	4,000
Radiowave Torpedos (1D6) Damages SHI and SYS.	2,000
Electromagnetic Railgun (1D6) Damages SHI and ENG.	2,000
Rogue-Bot Missiles (On a failed SYS Save, attaches to ship to steal data and track)	750

HULL MODULES	COST
Omni-Gel Coating (+1 armor)	500
Gray Matter Hull Infusion (+2 armor)	2,000
Nanobot Veil Generator (+3 armor, bulky)	4,000
Reinforced Plating (+2 HUL)	500
Carapace Shell (+4 HUL)	2,000
Neutron Titanium Husk (+6 HUL, bulky)	4,000
Magnetic Dampeners (EMP damage is impaired, REQ 12 ENG)	500
Emergency Breach Regulator (Automatically pass first HUL save, breaks after use)	2,000

ENGINE MODULES	COST
Unstable Shield-Gen (1D6 SHI, re-roll every time shields recharge.)	Free
Quality Shield Gen (6 SHI)	500
Premium Shield Gen (8 SHI)	2,000
Fuel Compressor (Req ENG 14) Carry 3 units of compressed starship fuel per hold.	500
Resource Skimmer (Req ENG 12) Skim gas giants for 1 tank of fuel every 1D6 hours.	2,000
Engine Booster (+2 ENG)	500
Power Reserve (+4 Energy Reserves)	2,000
Condensed Power Supply (+10 Energy Reserves, Bulky)	5,000

SYSTEM MODULES	COST
A.I. Module (Req SYS 12) A.I. can operate systems department or pilot the ship.	500
Afterburners (Req ENG 12) Burn half your fuel to make an immediate escape.	1,000
Cloaking Array (Invisible to radar)	1,000
Auto Smart-Shield (Activate to make next attack impaired, recharge in 1D6 hours)	1,000
Jammers (Activate to prevent all weapons systems in the vicinity from firing for 1D4 rounds, including yours. Recharge in 1D6 hours)	2,000
Subzero Coolant (+2 SYS)	500
Nano-Relays (+4 SYS)	2,000
Quantum Operating System (+6 SYS, bulky)	4,000

QUARTERS	COST
Crew Quarters: Rest comfortably on the ship (6 persons per crew quarter)	300
Mess Hall: Standard daily rations for all crew.	500
Brig: Impound 4 prisoners.	550
Vault: Secure storage.	750
Workshop: (Req SYS 12) Advanced project work for technology.	750
Research Lab: (Req SYS 12) Advanced project work for science.	750
Auto Medbay: (Requires SYS 14) Advanced recovery (as hospital/specialist healing)	1,000
Cargo Bay: Carry 4 trade goods in a single hold.	1,000
Smuggling Compartments: Carry 4 trade goods in a single hold (hidden).	2,000
Escape Pods: Safely jettison up to 10 people to the nearest star system.	400

PSIONICS

ABOUT PSIONICS

Psionic powers come from within. The awakening of an individual's ultimate potential. These powers are typically the result of evolution or genetic mutation, but can also come from other sources, such as stress, trauma, or powerful insight.

USING PSIONICS

- ▶ **Psionic powers must be channeled with one hand free.** For each use, take 1 fatigue.
- ▶ **Characters can enhance a power's impact** given time and safety (e.g., affecting multiple targets, increasing its power, etc.) at the risk of additional cost, such as more fatigue, WIL damage, or other consequences befitting the power.
- ▶ **If the PC is deprived or in danger,** the GM may require a PC to make a WIL save to avoid any ill-effects from using the ability. Consequences of failure are on par with the intended effect, and may result in added fatigue, WIL damage, mutations, other conditions, and even (rarely) death.

GAINING PSIONICS

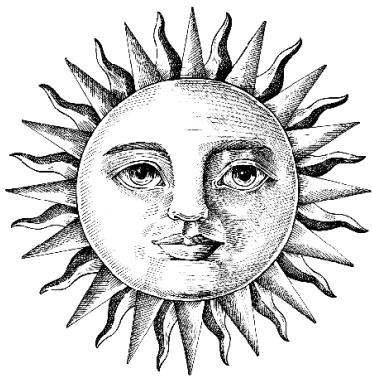

Characters can develop or acquire psionics through the fiction of play. Powerful psychological experiences, hallucinogenics, or experimental substances may unlock psionic potential in the brain.

D66 PSIONIC POWERS

- 11 Astral Projection:** Enter a trance for up to 10 minutes, projecting your conscious mind to a location you've been to before.
- 12 Attract:** Two objects are strongly magnetically attracted to each other if they come within 10 feet.
- 13 Augury:** Ask the GM a simple yes or no question to gain (sometimes fuzzy) knowledge of the future.
- 14 Befuddle:** A creature of your choice is unable to form new short-term memories for the duration of the spell.
- 15 Commune With Spirits:** The spirit of a nearby corpse manifests and will answer 1 question.
- 16 Cryokinesis:** Manifest a storm of ice and snow in a 20ft area for 1D6 cryo blast damage.
- 21 Displace:** An object appears to be up to 15ft from its actual position.
- 22 Echoing Voice:** You can mentally project your voice a great distance away.
- 23 Filch:** A visible item teleports to your hands.
- 24 Force Field:** A 20 foot dome or 60 foot wide, 10 foot tall high wall is protected from all mundane attacks for one minute.
- 25 Force Shell:** A creature you touch is protected from mundane attacks for one minute.
- 26 Hatred:** A creature develops a deep hatred of another creature or group and wishes to destroy them.
- 31 Hypnotize:** A creature enters a trance and will truthfully answer one yes or no question you ask it.
- 32 Knock:** A nearby mundane or technological lock unlocks.
- 33 Leap:** You can make a single jump up to 20 ft high.

- 34 Levitate Object:** An object hovers, frictionless, 2ft above the ground. It can hold up to one humanoid.
- 35 Magnetic Reversal:** Two objects are strongly magnetically repelled from each other within 10 feet.
- 36 Mind Scream:** Deal 1D10 mental damage at up to 4 enemies within 60 feet.
- 41 Memory Manipulation:** Alter a target's memory of an event, person, place, etc. If the target fails a WIL save, the change is permanent, otherwise the manipulation lasts 10 minutes.
- 42 Possession:** Target's spirit is caged within their body and replaced with the caster's. If the body is slain the original soul departs, but the caster must pass a WIL save to return to their body.
- 43 Pyrokinesis:** Manifest fire from your own body heat in a 20ft area for 1D6 thermal blast damage.
- 44 Scry:** You can see through the eyes of a creature you touched earlier today.
- 45 Shimmering Wall:** A straight wall of shimmering, 50ft long and 10ft high, appears at a location you can see.
- 46 Shroud:** A creature you touch is invisible until they move.
- 51 Shuffle:** Two creatures you can see instantly switch places.
- 52 Sleep:** Target falls asleep for 1D4 hours.
- 53 Spectacle:** A clearly false but impressive illusion of your choice appears, under your control. It may be up to the size of a palace and has full motion and sound.
- 54 Sympathetic Sense:** Choose one kind of object (keycard, cred-stick, weapon, computer, etc). You can sense the nearest example.
- 55 Telekinesis:** You may mentally 1 move item under 60lbs.
- 56 Telepathy:** Two creatures can hear each other's thoughts, no matter how far apart.
- 61 Trace:** An object you touch communicates to you the name of the previous owner along with a vague visual clue and general location.
- 62 Ward:** An ally becomes immune to mundane attacks for 1D4 rounds.
- 63 Warp Reality:** Time in a 50ft bubble slows down or increases by 50% for 10 seconds.
- 64 Whispers:** You can hear faint sounds clearly.
- 65 X-Ray Vision:** You can see through walls, dirt, clothing, etc.
- 66 Zero Sum:** Invade an enemy mind. Target must pass a WIL Save or their attacks become impaired

ASTROMANCY

ABOUT ASTROMANCY

Astromancy powers come from unknown outer sources. Some call it the true power of the stars. Others claim it's the remains of primordial dead gods. Ultimately, the universe is full of strange and unfathomable forces, most of it beyond our understanding.

USING ASTROMANCY

- › **Astromancy must be harnessed with one hand free.** For each use, add 1 fatigue or make a WIL Save vs Corruption. A good general rule is effects last 10 minutes.
- › **Characters can enhance a power's impact** given time and safety (e.g., affecting multiple targets, increasing its power, etc.) at the risk of additional cost.
- › **If the PC is deprived or in danger,** the GM may require extra WIL saves against corruption, or offer some other danger or risk.

ACQUIRING ASTROMACY

Gaining these powers often involves knowingly (or unknowingly) engaging with cosmic entities and dangerous living forces, exchanging some of your own life force and vitality for a drop of their power. Characters can acquire astromancy through the fiction of play.

D66 ASTROMANCIES

- 11 Alter Ally:** A willing target takes on a new form (keeping only their WIL), but must pass a WIL save to shift out.
- 12 Blood Pact:** Heal an ally for 1D6 STR at the cost of 1 STR of your own.
- 13 Cellular Subtraction:** A humanoid creature you touch halves in size.
- 14 Chameleon:** You become any inanimate object between the size of a grand piano and an apple.
- 15 Crippling Touch:** Target must DEX save or is paralyzed.
- 16 Dreamstalker:** Sends a message to anyone currently asleep. A malicious command triggers a WIL save or the target takes 1D12 WIL damage.
- 21 Displace:** An object appears to be up to 15ft from its actual position.
- 22 Disintegration Grasp:** Attempt to disintegrate an object you touch up to human size. Living targets DEX save to resist. Make a WIL save vs corruption. Take 1 fatigue.
- 23 Eyeball:** You can see through a magical floating eyeball that flies around at your command.
- 24 Fog:** Create a 40ft area of thick fog. You see through it normally.
- 25 Freezing Touch:** A thick ice layer spreads across a touched surface, up to 10ft in radius.
- 26 Hideous Strength:** Unarmed attacks are briefly enhanced.
- 31 Horrible Gaze:** Targets within eyesight must pass a WIL save or flee.
- 32 Invisibility:** Target is invisible until they attempt harm.
- 33 Lightning:** Electricity flings from your fingertips doing 1D12 damage (blast) in a straight line.
- 34 Lordly Voice:** A target obeys a single three-word command that does not cause it harm.

- 35 Mend:** You make minor repairs to a nonliving object.
- 36 Metamorphosis:** Caster takes on a new form (keeping only their WIL), but must pass a WIL save to shift out.
- 41 Mime:** Your appearance and voice becomes identical to those of a person you touched that day.
- 42 Mind Trick:** Creates a simple image with sound. A cursory investigation will reveal the illusory image.
- 43 Mystic Hand:** You control a phantasmal hand that can lift up to 5 pounds.
- 44 Obfuscation:** Change your appearance for 1D6 hours.
- 45 Ooze:** You become a living jelly.
- 46 Otherworldly Sense:** You can see or hear nearby magical auras and other sources of strange or weird power.
- 51 Quantum Ego:** Choose a second persona, regardless of features, sex and age. You can shapeshift to that persona a number of hours equal to your WIL per day.
- 52 Sculpt Matter:** Inanimate material behaves like clay in your hands.
- 53 Shattering Scream:** A single phrase from your lips does 1D12 blast damage. Affected targets are also deafened.
- 54 Shift:** An object or person you can see is transported from one place to another in a 50ft radius.
- 55 Smoke:** Your body becomes a living smoke that you can control.
- 56 Speed:** Your movement speed is tripled.
- 61 Spider:** You can climb surfaces like a spider.
- 62 Star Frost:** You can summon the bone chilling cold of space, covering a 40x40 foot area in frost and ice, obscuring visibility and making terrain treacherous.
- 63 Swarm:** You become a swarm of crows, rats, or piranhas. You can only be harmed by blast attacks.
- 64 The Black Verses:** An ancient, terrible script materialize on a surface you choose. Anyone reading these words becomes immobilized unless they succeed a WIL save.
- 65 Unravel:** An organic target must pass a WIL Save or take 1D12 STR damage. If they Save, you take 1D4 WIL damage.
- 66 Voidquake:** Rattle the fabric of reality around you in a 30 foot radius. Enemies take 1D6 damage and must Save vs DEX or be knocked down. Requires full movement to re-orient and stand up.

CORRUPTION

GAINING CORRUPTION

Some powers are beyond our ability to control. Corruption is the result of tampering with forces beyond your comprehension and those forces changing you. When dangerous powers are manipulated or strange cosmic encounters occur, there is a risk of those forces corrupting you, hollowing you out and stealing away your humanity.

Attempts to manipulate such forces require a WIL Save vs Corruption. Upon failure, roll for hollowing and then mark a point of corruption. Corruption is permanent.

HOLLOWING

Roll a D20 + current corruption on the Hollowing table to see how you are altered.

Example: You've failed two saves vs. corruption in the past, so your current corruption is 2. You again fail a save and roll a D20 for hollowing. Your result is a 7 and you add +2 for the result #9. Finally, add another point to your corruption total, which is now 3.

THE THREE ASPECTS

There are three primal forces that work in tandem to create universal balance. Tapping into these powers risks upsetting that balance as the wielder allows these forces to use their body as a catalyst. Which forces you allow in aren't up to you. Sometimes the void of space simply hollows you out a little more each time you call to it. Other times, one particular aspect crawls its way into you to claim a small part of your humanity for its own inscrutable patterns.

Sacred Geometry

The binding force that holds the universe together is imposing, immovable, and uncompromising. Some call it order, others harmonica universalis, the music of the spheres, perfection, and life.

Entropy

The other face of order is utter oblivion. This devouring chaos manifests as black holes, destruction, and the inevitable unraveling to come.

Non-Euclidean

Beyond the paradigm of order and chaos lies another force, completely unknowable and terrifying. Is it the inscrutable arithmetic of alternate dimensions, or simply another mystery that will consume everything?

ASPECT DISTORTION

After gaining a fifth aspect of the same kind, you are changed into a non-player character, pose an immediate threat to the party, and a long-term threat to the universe.

Sacred Geometry

Balance and order is the only worthy calling. You transcend your mortal shell and become a being of pure stardust, and will destroy anything that does not serve the sacred order of the universe.

Entropy

Your mortal shell is claimed as an agent of destruction. Your body becomes a mass of pure black stardust and only the cruelest parts of your personality remain.

Non-Euclidean

You explode into a mass of writhing shapes and angles that drive others to madness. All who behold your transformation must save vs WIL or be rendered insane for 1d10 hours. You now only exist for your own inscrutable machinations as an impossible being of mind-boggling contradictions.

D20	HOLLOWING
1	Your fingertips turn pitch black.
2	Peculiar symbols begin to appear on your body. Overtime they spread.
3	You can mimic the voice of anyone with whom you have conversed or heard speak.
4	You can sense nearby otherworldly beings and objects.
5	You can move small nearby objects with your mind.
6	Gain one Sacred Geometry Aspect
7	You only want, and can only eat, raw meat.
8	Gain one Entropy Aspect
9	Machinery and technology has a 1 in 6 change of malfunctioning around you.
10	Gain one Non-Euclidean Aspect
11	You are immune to electricity, but fire ignores all of your armor and hit protection.
12	Gain one Sacred Geometry Aspect
13	Roll a random Astromancy and reduce your STR by 1.
14	Gain one Entropy Aspect
15	Roll a random mutation (pg. 89)
16	Gain one Non-Euclidean Aspect
17	You emit a dread aura, and all reaction rolls made near you are one category lower.
18	Gain one Sacred Geometry Aspect
19	You are immune to ranged energy weapons but your HP is reduced by 1d6.
20	Gain one Entropy Aspect
21	You can no longer carry weapons in your hands. Increase your WIL by 1d4.
22	Gain one Non-Euclidean Aspect
23	You crave terrible power and are deprived if you don't Save vs Corruption once a week.
24	Gain one Aspect of whichever category you have the most.
25	Gain one point of permanent fatigue as your body weakens.
26	Gain one Aspect of whichever category you have the most.
27	You must eat the flesh of humans once a day or become deprived.
28	Gain one Aspect of all three types.
29	You stand on the brink of oblivion. Your presence in the universe is considered a threat to all living beings. Powerful forces are hunting you to end your threat.
30	The Jaws of the Cosmos Consume You. You are utterly destroyed. Every nearby character gains 2 corruption and makes two rolls on this table.

D12 Sacred Geometry Aspects	
1	You can sense nearby abnormality or cosmic disorder.
2	You can communicate with living plants. They can only communicate vaguely.
3	You can communicate with animals in a capacity similar to talking to a 5 year old.
4	Your presence can soothe the anxious or confused.
5	You can spend 1 fatigue to heal broken bones, or mend other minor injuries.
6	Glow with faint starlight at will, resisting the effects of cold environments.
7	You continue to age normally but cannot die of old age.
8	You may remove 1 fatigue from yourself or an ally once a day.
9	You can restore 1d6 STR damage at the cost of 1d6 WIL once a day.
10	You are unaffected by WIL damage and WIL-based critical effects.
11	You can create a genetic mirror of yourself for one minute.
12	The Ancient Humming: You can emanate the music of the spheres (1d10 blast aura, 1 fatigue)

D12 Entropy Aspects	
1	Your eyes turn pitch black. This is unsettling to those who look at you.
2	A chilling aura surrounds you, leaving traces of frost.
3	One of your limbs decays and falls off. Increase your WIL by 1.
4	You can sense nearby dying or recent death.
5	Inhaling smoke sustains you in the same way food and water does.
6	If someone dies in your presence, you restores any single ability score loss by 1d4.
7	You grow quite pale and develop a presence that easily intimidates the cowardly.
8	All fear your dread presence and obey your threats (1 fatigue)
9	Pale shadows follow you, speaking the secret fears or those nearby.
10	You do not need to eat, sleep, or breathe.
11	You can touch others and consume part of their vital life-force, dealing 1d8 DEX damage.
12	Oblivion Chrysalis: Any WIL damage done to you is reflected back upon the attacker.

D12	Non-Euclidean Aspects
1	You know someone's location that you have encountered if they speak your name.
2	You can easily sway the weak minded, and influence stronger minds. (1 fatigue)
3	You grow a third eye on your forehead that can see the invisible or cloaked.
4	You no longer appear as a living creature on any technological scan or radar.
5	You no longer suffer the effects of poisonous or toxic atmospheres.
6	You can detect nearby artifacts and other abnormalities.
7	You move and breath in complete silence.
8	You can see through invisibility and cloaking.
9	You can walk inside the dreams of others.
10	You and your allies can trans-dimensionally skip to a previous location once a day.
11	You can speak in a terrible utterance and deal 1d8 WIL damage.
12	Forbidden Entanglement: You exist within such an unstable quantum state that fatigue no longer effects you. But, lose 2 inventory and reduce STR by 1d4.

EXPERIMENTAL TECHNOLOGY

ABOUT EX-TECH

Experimental nanotech, illegal prototypes, underworld bio-tech, and black market software are just a few types of experimental technology that players might encounter.

- ▶ Ex-tech can be an item, armor, weapon, or piece of software that alters other items.
- ▶ Ex-tech should either do something very specific, or cost fatigue for use if very useful.

D66 EX-TECH

Roll 1D6 for the first digit and then 1D6 for the second digit.

11. Cloaking Jacket: Can perfectly imitate its surroundings for an hour. Recharges in 48 hours.

12. Codescrambler Protocol: 3 charges. Small chip that inserts into neural cyberware “brain jack”. Wirelessly unlocks tech doors. Recharge: Must defrag for 1D4 days on ship.

13. Centurion Falcon: Cybernetic falcon bound to you via mind-linking A.I. (6 HP, 14 DEX, 7 WIL, D4+D4 claws)

14. Bluescreen Blade: Small blade of faint light and static. Machines must make a STR save or take 1D20 damage. No effect on organics.

15. Spray Skin: Restores 1D6 STR damage. One use. Causes 1 fatigue. Color and texture of skin are random.

16. Hover-Mule: You activate a 3ft wide floating disk that has 6 inventory slots for carrying.

21. Shrink-House: Small cube, when activated expands into a house that can shelter up to 10 creatures, disappearing after 24 hours.

22. Poseidon Shovel: Molecularly-attuned rod. Raise, lower or part nearby waters.

23. Atomic Displacement Array: (Bulky) Spend 10 minutes attuning to two nearby objects. Swaps their material type. Unethical to use on living beings, but...not impossible.

24. Dream-Slicer: (illegal) Scan target's dreams. Target makes a WIL save. On a fail, allows for manipulation and inception of target's dreams.

25. Caduceus Cigars: (6 pack) Emblazoned with twin coiled snakes. Using clears any poisons, toxins, mind altering conditions, or states of stupor. Great for hangers.

26. Greed-Calibrated Compass: Type in an object or location. The compass will navigate you in the general direction and indicate vague distance.

31. Anti-Gravity Grenade (1 use): A small black grenade. Disables the effect of gravity on everything in a 30ft radius.

32. Mockingbird Gum: A pack of green and blue speckled minty sticks of bio-engineered chewing gum. Allows anyone chewing it to emulate another person's voice for one hour.

33. Nano-Particle Shell: (+1 armor, resistance to shock) Body armor made of millions of microscopic particles. Instantly assembles or disassembles into belt via smart-word.

34. Mouser Bomb: (1 HP) Tiny robotic mouse that taunts (WIL save) and explodes for D12 blast on death.

35. Quicksilver Skeleton Key: (D6 usages) Liquid metal key that fits into and opens any mechanical (non-electronic) lock.

36. Smart-Wrench: Advanced multi-tool. Can make minor repairs to a nonliving object.

41. Shrink Ray: (Bulky) Can shrink an object to one tenth its size. Recharge in 24 hours.

42. Microquake Rifle: (D6 Sonic, Bulky) every hit, target makes a STR save, on a fail their armor shatters.

43. Overload Protocol: Any smart weapon can load a software update to add the “overclocked” quality.

44. Sub-Space Tracking Kit: A small magnetic censer can be placed and tracked with the display device up to 3 sub-sectors away.

45. Gate-Drive: Small device. When plugged into a digital screen it creates a gateway to another screen that you were within 10 feet of today.

46. Anti-illusion Lens: You see through all nearby illusions. Can clip on to helm, over the eye, or can simply be held.

51. Magnet Lance (grappling vs metal armor, no save) Fires a hyper-magnetic cube attached to a metal cable. Once magnetically attached, the user can re-fire the weapon to pull a target back toward them at a rate of 20’ per second. Target must make a save vs STR or be knocked down.

52. “C4S-P3R”: Custom A.I. from a famous robotics expert. Single run. This A.I. is currently locked on a small device. A massive databank of knowledge and astral navigation data. The personality of the A.I. is difficult and often antagonistic, but usually cooperative.

53. Cortex Eraser: Innocuous. Looks like a pen. When flashed, up to 4 targets temporarily lose sense of place and time. WIL save to resist.

54. Eradicator Syringe: (1 use) Prototype serum. Injecting causes 1d20 WIL damage.

55. Aegis Battery: Create a shimmering, semi-transparent surface that only you may pass through. Anyone else that touches the wall is fried for D12 damage. The field lasts until shut down. Recharges for 500C at any large spaceport.

56. Electron Uncoupler: Choose a target and roll D12. If this is equal or higher than their current hp they are completely obliterated by subatomic vibrations. Take 1 fatigue.

61. Nanobot Swarm: When activated a 20ft swarm of nanobots moves 10ft away from you each round. Anyone within loses d6 STR every round. Does not trigger save.

62. Omni-Phonic Earjack: Metal plate covering the ears and back of the head. Requires a data-jack augmentation. Allows the wearer to directionally tune their hearing to specific locations up to 100 feet. Extended use causes fatigue.

63. Emergency Mind-Cache: Store your consciousness, memory, and personality into a highly advanced device. Upon death, it may be re-uploaded (destroying it) into a new body or other fitting receptacle. Ability scores will be subject to change.

64. Hyperstar Coilgloves: (D8 shock damage, bulky). Tech gauntlets. On critical damage, STR save or damage jumps to nearest target.

65. Quick-Cloner™: A perfect duplicate of you is formed from your DNA. Acts autonomously. Can only perform basic tasks or obey simple commands. The double lasts for 1d6 hours then crumbles to dust. Take 1 fatigue.

66. Black Hole Generator: Create a five-foot miniature black hole. Anything entering it is utterly destroyed. Cannot be moved or placed on top of an object or opponent. Lasts 10 mins or until the generator is turned off. Recharge by exposing the generator to a scientific anomaly.

ARTIFACTS

Strange or ancient objects imbued with mysterious powers, often found in dangerous places, such as tombs, excavation sites, derelict ships, and the dwellings of powerful beings. Artifacts sometimes display unusual properties or limitations. Artifacts will attract the attention of those who seek their valuable power. It is dangerous to display them openly.

D66 ARTIFACTS

Roll 1D6 for the first digit and then 1D6 for the second digit.

11. Symbiotic Sludge: A translucent gray slime that conforms to your arm like a glove. Allows the wielder to extend their hand up to 10 feet. Only bonds with unmodified organic tissue.

12. The Profane Orb: A sphere of black quartz the size of a large grapefruit. The swirling mists within whisper hideous secrets. While held with both hands you can mentally command animals. Save against corruption when used.

13. The Dead Code: A small, gray cylinder, this device is all that remains of an ancient A.I. that self-destructed for unknown reasons. Plays a recording of an auditory string of math that transmits a virus. Forces any machine that hears it to make a WIL save or shut down for 2d12 hours.

14. Vial of Golden Light: Consuming grants a random Astromancy and permanently lowers WIL by 1d4.

15. Soothsayer's Whetstone: Kindle violet fire that allow for communication for 1d4 minutes to any other fire from a place you are familiar with.

16. Hateful Mirror: Small mirror that causes great pain to the viewer, who must WIL save or scream until they pass out (1d4 WIL loss). A successful save destroys the mirror.

21. Spoon of the Gourmand: Oversized silvery-blue spoon. Allows you to eat anything to gain a day's worth of sustenance as if eating a ration.

22. Odd Flask: Makes alcoholic drinks more powerful; but, if you drink water from it, you immediately become sober.

23. Mesmer's Amethyst: Any creature within 10 feet of this violet, eye-like marble must pass a WIL save or be distracted by it, losing its next turn.

24. Lucky Feather: Magnificent gold and green feather. When worn in a hat, survive a normally fatal fall and land gracefully. The feather is mysteriously lost afterwards.

25. Spirit Cube: (2 charges) Small sapphire cube. Releases a vengeful spirit (4HP, 14 WIL, d6) under the bearer's control. Recharge by killing in cold blood.

26. Indigo Fungus: Consuming changes your skin a deep shade of indigo and increases your WIL by 1.

31. Tyrant's Collar: Black iron collar inscribed with an ancient script. A target is compelled to follow a stated course of action, without understanding why.

32. Titans' Brew: (1d4 uses) Bottle of ancient grog. Target's strength triples for 10 minutes; unarmed attacks are enhanced.

33. Horrible Bell: Ringing this small, black bell releases a painful sound that causes 1D6 STR damage to all nearby whom the wielder deem their enemy, ignoring armor.

34. Necro-Canary: Small bird skeleton that will follow you obediently. Crush it and scatter its bones to scry on an object, or familiar creature, indicating its precise location. The bones will reform into the bird the next day.

35. Genesis Globe: (1 use) Smash this egg-sized glass orb. Over an hour, one damaged or ruined structure, ship or similar target is repaired to peak condition without need for materials.

36. Red-Gold Spectacles: While wearing these glasses you can visualize a general sense of somebody's honesty and sincerity while they speak.

41. Devil-Fog Idol: Energy-absorbing fog surrounds you and everyone within 20ft. Ranged weapons cannot pass through the smoke. Save vs corruption

42. Neutron Halo: (Helmet) Ring of swirling black space-stuff. Can emanate pure darkness in a 10-foot radius. 1 Fatigue.

43. Unholy Feast: This black muck smells irresistibly delicious. Eating it coats the inside of your mouth and teeth pitch black. You can now consume anything safely.

44. Old God's Hammer: (D8) Lost any other powers it once may have had, but can still be called to return to you, flying by the best route possible.

45. Starbond Ichor: Pouring on a corpse causes it to return as a loyal companion that will serve as a freelancer.

46. Lazarus Serum: Old syringe in a forgotten tongue. A corpse is miraculously restored to life if they pass a WIL Save. If they fail the Save, the remains are utterly destroyed.

51. Red-Queen's War Scepter: (D8 Cryo, Brutal) This ancient war scepter contains the spirit of a millennium-old tyrant queen. She audibly delights in wanton bloodshed.

52. Living Vortex: This small stone box can direct a powerful wind in a straight line, strong enough to blow over boulders.

53. Octarine Egg: A scaled, fluorescent greenish yellow-purple egg about the size of a man's head. Hatches in 1d20 days. Generate NPC stats for a baby creature.

54. Ambrosia: Glowing golden liquid found inside a bizarre flower that grows in dangerous locations. Tastes like honey nectar and increases max HP by 1D4, turns your teeth to gold.

55. Soothsayer Bastet: (10 HP, 14 DEX, D6+D6 claws, Horrible Gaze Astromancy) Large black panther with bat wings. Can fly short distances. Obeys the one who frees it from its astral shackles.

56. Hurricane Mantle: Tattered gray cloak. Allows the wearer to fly for 1d6 minutes a day, or 2d6 minutes in stormy weather. Causes 1 fatigue.

61. Blood Corrupting Blade: (D4) Small curved dagger. If a target damaged by this weapon takes Critical Damage that day, they explode in a bloody mess.

62. Spear of Seven Suns: Golden spear with a glowing white blade. Functions as a spear (D8, Sweep) and fires a beam of white light (D6 Thermal, Exploding).

63. Star-Worshiper's Mask: (bulky) Porcelain mask with an unnerving expression. Raises the wearer's WIL by 1D4 and gifts them with an intimate knowledge of the forbidden secrets of star worship. Save against corruption once a week.

64. Cobra God's Bones: (unwieldy) Large bundle of heavy bones. Offer a bit of blood to automatically succeed on your next STR or DEX save, but save vs corruption when you use this artifact.

65. The Book of Adrammelech: The inscrutable unholy verses of some precursor entity. Daily study changes your mind, gifting you 1 new random astromancy power a week (or every other session, GM's call) at the cost of losing 1 point of STR.

66. Starlight Blade: (d10, thermal, vorpal) Ancient metal sword hilt. Activating brings forth a blade of pure starlight (random color.) Critical damage severs targets in half. The weapon requires a WIL of 14+ or the wielder must save vs corruption every day.

AUGMENTATIONS

BODY SOCKETS

Characters have 12 Sockets available on their body for installing upgrades: Cerebral, Eyes, Lower Face, Skin, 2 Arms, 2 Legs, and 2 Internal, 2 torso. These Sockets can be filled with cyberware & implants, gene-modding, or other augmentations. Some upgrades will have requirements. More powerful and complex upgrades will often occupy multiple sockets at once. Occupying 6 sockets or more reduces your WIL by 1D6, and another 1D6 at 12. Most augments have a price and can be purchased from specialists, but they can also be acquired as the result of in-game progress. Removing an augment usually has a price.

ACQUIRING IN PLAY

If the cost says “play”, these sorts of augmentations are likely to be gained from strange encounters, monster attacks, gifts from peculiar entities, or some other narrative hook.

CYBERWARE & IMPLANTS

These are wholesale pieces of machinery grafted onto the body, often replacing the original part, or hardware and software installed inside the body.

GENETIC MODIFICATION

Gene-modding involves editing your DNA and genetic structure at the molecular level. Sometimes these are mutations from interacting with alien materials or consumables.

UNKNOWNABLE CHANGES

Some things that exist might not fall neatly into another category. Some things can't yet be explained by science or technology. These can be mutations, interacting with strange alien artifacts, or coming into contact with otherworldly forces. Sometimes odd peddlers will have these wonders for sale, but often the price is interacting with something mysterious.

CYBERWARE & IMPLANTS	COST
Standard Brain-Jack (Neural Socket) Installs advanced neural processor and external hardware input. Allows for installation of cerebral software packages.	500
Auto-Babel Brainstem (Neural Socket) A brainstem implant and smart software to understand all languages. Who knows what would happen if it malfunctioned...	1,000
Bionic Oculus (Eyes Socket) Computerized eyes overlaid with augmented reality interface, including quick-referencing faces to local database searches, locating other networked devices (such as security cameras), and limited zoom and camera features.	800
Backup Heart (Internal Socket) If you would die, automatically survive but this Augment is destroyed and the socket is permanently disabled. Stabilize and restore all HP. Backup heart will only keep you alive for 1D6 hours, so seek immediate medical attention.	1,750
Bionic Tendons (2 Leg Sockets) Allows you to fall from up to 50 feet and land gracefully without any consequences. Falls up to 100 feet also get ADV on Saves.	500
Mag-Steel Arm (Arm Socket) Requires losing your entire arm, otherwise elective replacement permanently removes 1 WIL score from the trauma. Advantage with STR saves. Can effortlessly crush most small or medium objects.	1,300
Shiva Harness (Torso Socket) Back plate that connects to your sympathetic nervous system. Can open to reveal a mechanical arm on each side.	2,000

GENETIC MODIFICATION	COST
Plasti-Scale Skin Graft (Skin Socket, requires severe burn damage) Spray-on synthetic skin from sea-creature DNA. Only adheres to burn wounds. +3 Armor vs Thermal/Heat/Fire.	1,500
Frog Tongue Mutation (Lower Face Socket) You have a long sticky tongue that extends 20 feet. 1D6 damage and can grab small objects.	Play
Edited Pheromones (Internal Socket) You have a pleasing fragrance to most other humanoid species, giving you +2 to reaction rolls.	900
Self-Sterilizing Liver (Internal Socket) You are immune to all ingested poisons.	400
Basilisk Gland (Lower Face Socket) Spit acid in a cone once a day (1D8 biological, blast, 30 feet)	900

UNKNOWABLE CHANGES	COST
Star Slug (Neural Socket) You are the symbiotic host to an alien slug. It crawls into your ear and tells you things. The star slug lets you talk to any creature of animal intelligence. Must eat something living every 7 days or the Star Slug will die, permanently lowering your WIL by 1.	3,000
Servant of the Dead Moon (2 Internal Sockets) You willingly let an otherworldly force enter your mind, sharing knowledge with your bones and blood. Under a full moon, your skin glows with a soft light. You can project your voice into the minds of others up to 100'	Play
Devil-Leopard Mutation (1 Internal & Skin Sockets) Exposure to alien bacteria has mutated your skin crimson red with dark indigo spots. You can crack most metal and bones with your teeth.	Play
Mask of Pale Starlight (Eyes and Lower Face Socket) Splash your face with this silvery liquid. Your face can change at will. Save against corruption.	Play

TALENTS

ABOUT TALENTS

Talents represent a particular skill or knack. In most cases, talents may be awarded to players by the GM when they have accomplished some sort of in-game goal, found a particular source of training, or have otherwise been influenced by the world through the fiction of gameplay.

Listed here are some examples of talents. Be encouraged to make your own. Talents can often be made more interesting when they focus less on numbers and modifiers and more on in-world qualities. References to L means character “Level”.

ACQUIRING TALENTS

- › **Training:** Training with an NPC that can teach the ability.
- › **Data Chips:** If players have a neural port or similar cyberware installed in their neural socket, data chips with “programs” (a particular talent) may be slotted in. More expensive neural cyberware will have more available ports for these “programs”.
- › **Encounters/Experiences:** Particularly odd encounters may imprint a character with certain talents supernaturally (if it makes sense.) Place these moments in the same way you would place loot, and earning the talent should require a hidden trigger or a risky action to acquire. (example: If a player makes a daring speech to draw the attention of an enemy away from their critical wounded ally, maybe you could reward them with the “Taunt” talent as a form of narrative advancement.)

D20	TALENT	DESCRIPTION
1	Inspiring Presence	You gain +1 effect on morale checks and reaction rolls when dealing with the military, hirelings, and other law-abiding or honor-bound citizenry and creatures.
2	Adrenaline Rush	Any time you roll the maximum value for your damage die, you can make another attack on a different target.
3	Human Shield	Once per round, you can take the damage inflicted against any nearby ally by an enemy or effect in their place. Make a successful STR save for half-damage.
4	Butcher	When you kill an enemy with a melee weapon, you can make another attack against another nearby enemy. This can occur as many times per round equal to your level.
5	Bloodthirsty	The first attack you make in combat is enhanced. This can occur as many times per day equal to your level.
6	Precise	Re-roll damage rolls of 1.
7	Resilient	The first attack made against you in combat is impaired.
8	Escape Artist	Once per day, you can automatically wriggle free from a restraint which allows some plausible escape, such as a chokehold, pinned limb, or noose.
9	Quantum Dagger	You always have a dagger hidden on you. You don't reveal to anyone as to how they got there. You're not sure, yourself. It does not occupy inventory space.
10	Paralyzing Blow	When you deal maximum damage with a melee weapon, your target's next attack is impaired.
11	Cantina Scum	You always act first in that break out in cantinas, bars, or casinos.
12	Uncanny Knack	Once per day, you can automatically succeed on a single saving throw, regardless of context.
13	Gang Up	+1 dmg per ally adjacent to target, capping at +3.
14	Taunt	Taunt an enemy, forcing them to make a WIL Save. If they fail, their next attack is impaired if it's against anyone other than you.
15	Hearty Frame	You have reduced effect on all failed saves related to sickness, poison, and disease.
16	Pack Rat	You have 4 extra inventory slots for rations, meds, rope, and other medium or small tools & gear.
17	Natural Empathy	You gain +1 effect on morale checks and reaction rolls against beasts or unintelligent monsters encountered in wilderness or dungeon environments
18	Field Medic	Restore 1d4 STR damage L-times daily with a medkit. This depletes the medkit.
19	Mystic Link	1d4 chance to not gain fatigue when using Astromancy.
20	Junker	You're good with "slightly used" equipment, and don't have to roll when using cheap weapons.

NPCS

NPC TEMPLATE

Use the following template to model any more sophisticated Monster, Enemy, or NPC:

NPC Name

X HP, X Armor, X STR, X DEX, X WIL, Weapon (dX, special items, qualities)

- › Engaging description of appearance and demeanor.
- › Quirk, tactic, or peculiarity making the NPC unique.
- › Special effect or critical damage consequence.

GENERAL PRINCIPLES

Ability Scores: 3 is deficient, 6 is weak, 10 is average, 14 is noteworthy, 18 is legendary. Any ability score not listed is treated as 10.

Hit Protection: Give average creatures 3 HP, hardy ones 6 HP, and serious threats get 10+ HP. Remember that HP is Hit Protection, not Hit Points. It's a measure of resilience, luck, and gumption, not health.

Other: Use flavor and style to help them stand out. Use critical damage to lean into the threat or strangeness of any aggressive NPC.

ADDITIONAL ADVICE

- › Is it good at avoiding a hit? Give it **HP**.
- › Does it soak up damage? Give it **Armor**.
- › Is it strong? Give it a high **STR**.
- › Is it nimble? Give it high **DEX**.
- › Is it charismatic or mentally powerful? Give it high **WIL**.

Damage dice are roughly the same, though armed attacks do at least 1d6 damage.

CONVERTING FROM CLASSIC OSR GAMES

- › Give 3 HP per HD for most creatures.
- › Most humanoids have at least 4HP.
- › WIL can be used as a baseline for morale.

CONVERTING FROM MODERN SCI-FI GAMES

- › Any sort of panic or stress condition can be handled by making a WIL save vs. corruption, fatigue, or deprivation.
- › Generally the best way to convert any NPC is to describe them in fictional terms (strong, slow, not armored, carries a large gun) and then turn that description into Monolith's mechanics.

SAMPLE BESTIARY

Street Scummer

3 HP, 8 STR, 12 DEX, 8 WIL, Shiv (D6)

- › Avoids combat unless they have the advantage (such as greater numbers).
- › Usually running a scam or looking to steal.
- › Will trade information for money or favors.

Gang Enforcer

7 HP, 13 STR, 8 DEX, 10 WIL, any simple weapon.

- › Not too bright, easily manipulated.
- › Brute force tactics, tends to rush in head-first at whomever looks toughest.
- › If they're the last man standing, they will throw a thermal detonator instead of fleeing with no regard for their own safety.

Space Pirate Captain

10 HP, 10 STR, 12 DEX, 14 WIL, Beam Rifle (D8 thermal)

- › Swaggering bravado and a love for the finer things. Loves to make deals for profit.
- › Keen eye for betrayal, will fake surrender and cheat deals if they can sense dishonesty.
- › Prefers to take hostages over killing.

Prototype War-Droid T-89 "Drake"

12 HP, 2 Armor, 14 STR, 8 DEX, 4 WIL, plasma-saw (D10 thermal, melee) and twin-cannon array (D6 + D6 blast)

- › Military tech designed for urban warfare, looks like a large metallic insect.
- › Is constantly analyzing battlefield data, will seek to optimize damage against the weakest target or highest cluster of targets.
- › Critical Damage: Plasma-saw will sever a random limb. (D4, L. Arm, R. Arm, L. Leg, R. Leg)

Feathered Void-Squid

6 HP, 2 Armor, 16 STR, 5 DEX, 8 WIL

Tentacle Swarm (D6 + D6 blast), Dying Screech (1D6 DEX damage, only used near or at death).

Beak Bite (D12 melee), critical damage results in disembowelment. Void-Squid will spend the next round feasting.

- › Elephant-sized squid covered in gray feathers with a vicious beak.
- › Slow moving, often lays in wait for prey. Can reach up to 20 feet with its tentacles.
- › STR Save vs grappled on tentacle critical damage. If grappled, Voidsquid's beak will sever a random limb.

PLANETS

PLANET ATTRIBUTES

All planets have the following attributes. Roll randomly or select. These attributes are only suggestions, feel free to define planet quality with other metrics or descriptions.

2D6	TEMPERATURE
2	Frozen: Requires exosuit with cryo protection.
3	Cold: +1 fatigue if not wearing warm equipment.
4	Variable Cool
5-9	Temperate
10	Variable Warm
11	Hot: +1 fatigue if wearing anything warm or heavy (like armor or thick clothes)
12	Burning: Requires exosuit with thermal protection.

2D6	ATMOSPHERE
2	Corrosive: Requires exosuit and oxygen supply.
3	Airless: Requires rebreather
4	Thin: Rebreather or double fatigue gains.
5-10	Breathable: Earth-like oxygen.
11	Thick: Rebreather or double fatigue gains.
12	Invasive: Requires exosuit and oxygen supply.

2D6	DOMINANT BIOME
2	Oceans or Swamplands
3	Deserts or Wastes
4	Jungle or Forest
5-8	Earth-Like Diversity
9	Gas Giant, Moon, or <i>other</i>
10	Bio-Engineered
11	Strange/Anomaly or Alien
12	Synthetic, Mechanical, or A.I. Dominated

2D6	TECH LEVEL
2	T-0 Neolithic
3	T-1 Medieval
4	T-2 Industrial
5-6	T-3 Modern Earth
7-10	T-4 Advanced (Stellar)
11	T-5 Advanced + (Interstellar)
12	T-6 Hyper Advanced (Galactic)
-	T-X Optional. Unfathomable, Godlike, Mythical.

2D6	LAW LEVEL
2	Lawless: No noticeable authority or system of laws. It's either anarchy or the strong ruling the weak.
3-4	Vague: Laws are extremely localized and barely enforced, perhaps merely existing as a custom or ritual.
5-7	Lenient: Authority is decentralized across multiple regions, states, or corporations. Carrying military weaponry in public is frowned upon, but rarely enforced, depending on where you are.
8-9	Moderate: Authority is mostly centralized but somewhat relaxed. Carrying military weapons in public is still illegal and enforced.
10-11	Strict: Authority is centralized and strict. Weapons are banned for civilians except in certain wilderness areas.
12	Police State: Authority is ever-present. Surveillance is ubiquitous, and laws are harshly enforced.

2D6	COMPLICATIONS
2	Civil War or Internal Conflict
3	Political
4	Criminal
5-9	Social
10	Nature
11	Technological
12	Weird or Mysterious

INTERPRETING RESULTS

Rolling (for example) hot, thick, wastes, industrial, lawless, technological complications, and small population might look like a volcanic planet, post eruption, scavenger society and heavy resource mining, bringing the big picture together.

2D6	POPULATION SIZE
2	Failed Colony or Abandoned
3	Outpost (hundreds)
4-5	Small (thousands)
6-7	Medium (hundreds of thousands)
8-9	Large (millions)
10-11	Billions/City-Planet
12	Ruins or Disaster

FINALIZING PLANETS

Take the rolls for planet attributes. List out any additional qualities you want to include. What's listed for the planet doesn't have to be exclusively from the dice rolls.

SAMPLE WORLD

Attributes

- › Breathable
- › Variable Warm
- › Desert
- › Small Population
- › Strict Laws
- › Industrial Tech

Qualities

- › Militaristic
- › Low-tech
- › Imperial Outpost
- › Gang Warfare
- › Manufactures Nutrient Paste
- › Diamond Mining
- › Illegal Drug Manufacture and Trade

Complications

- › Customs Officials
- › Military Police
- › Gangs
- › Planetary Civil War
- › Trade Embargo
- › Drug Smuggling Ring
- › Security Codes Needed

FACTION RULES

TYPES OF FACTIONS

Factions generally fall into one of the below categories, but there can be more, and often they're blended:

- › **Governments**
- › **Corporations**
- › **Criminal** (gangs, pirates, syndicates, mafias, cartels)
- › **Mercenary**
- › **Media & Entertainment** (news, social media, etc.)
- › **Manufacturing** (engineering, weapons, starships, A.I., drugs)
- › **Services** (transport, information, etc)
- › **Cults**
- › **Cultural Organizations** (unions, clubs)
- › **Religions**

RESOURCES

Faction resources can range from wealth, manpower, technology, influence, reputation, or other abstract sources of power.

GOALS

- › Factions are always working towards some kind of goal.
- › The goal should be something the players can get involved with, and those goals will typically butt up against the goals of opposing factions.
- › Individuals inside a faction have their own personal agendas.

GOAL PROGRESSION

- › Factions may have several goals, but can only be actively working toward one goal at a time.
- › Goals are indicated with boxes ranging from 2 to 10, depending on complexity.
- › Between sessions or at certain intervals of time based on the goal (weeks, months) **roll 2d6** and consult the chart below. Add +1 for relevant resources or help from players. Subtract -1 for interference from rival factions or the players.

2	3-6	7-11	12
Setback (-1 box)	No progress	Progress (+1 box)	Windfall (+2 box)

- › When a faction completes a goal, it will usually mean adding a new resource. Goals can include reducing other factions resources, power, or influence.

FACTION QUALITIES

Some factions will be violent, diplomatic, crafty, ambitious, underhanded, benevolent, peaceful, hidden, famous, infamous, etc. Give each faction a few descriptors to paint a picture, the rest can be developed through play.

FACTION SIZE

Faction size determines their range of power and influence. Feuding with a size above or below usually results in some sort of bonus or penalty. Faction size can fluctuate with major gains or losses.

- › Size 1: Local to planet
- › Size 2: Local on multiple planets and surrounding orbits
- › Size 3: Large Influence over entire star systems
- › Size 4: Major influence over several systems or whole sub-sectors
- › Size 5: Grand influence extends from multiple sub-sectors to several entire sectors.

SAMPLE FACTIONS

THE RAZORCOATS

Size 1: A local, planet side underworld gang.

Notable members

Gaz the Younger, leader. A feared gangster involved in racketeering and arms dealing.

Resources

- › Gang Enforcers (detachment)
(stat individually like “Gang Brute”)
- › Underground Hideout (in slums)
- › Local Weapon Trade Monopoly
(2d6 weekly income)

Goals

- › ☐☐ Expand Control of Local Black market Weapons Market
- › ☐☐☐ Infiltrate Local Government
- › ☐☐☐☐ Take down rival gang

JOYBIRD MEDIA GROUP

Size 4: A major news media outlet and social media influence among youth demographics.

Notable members

Hamish Redd, CEO. Beloved celebrity icon.

Resources

- › Lifestyle brand influence of youths.
- › Massive wealth and media reach
- › 1d4 chance to have blackmail “dirt” on other factions in their area of influence. Re-roll every week for new dirt.

Goals

- › ☐ Controlling current political narrative
- › ☐☐☐ Expand to nearby sectors
- › ☐☐☐☐ Launch CEO’s political campaign

TABLES & GENERATORS

ALIEN SPECIES GENERATOR

Roll once or multiple times on each table to generate alien species or other cultures.

D44 Quality	D44 Physical Trait	D44 Physiology
11 Indigo	11 Multi-Armed	11 Wolf or Canine
12 Crimson	12 Undead	12 Avian
13 Striped	13 Advanced Tech	13 Simian
14 Spotted	14 Shrouded Clothing	14 Swine
21 Golden	21 Armored or Tribal	21 Reptile
22 Pale	22 Long Neck or Limbs	22 Crustacean
23 Shadowy	23 Antennae or Tentacles	23 Insectoid or Arachnid
24 Green	24 Multi-Eyed	24 Ursine
31 Translucent	31 Synthetic	31 Rodent
32 Laughing	32 Horned or Winged	32 Feline
33 Royal	33 Spines or Spiked	33 Human-like
34 Warlike	34 Mechanical	34 Amphibian or Fish
41 Mystic	41 Crystalline or Plantlike	41 Dwarf
42 Filthy	42 Smoldering or Frozen	42 Giant
43 Nomadic Traders	43 Gelatinous	43 Amorphous
44 Inventors or Crafters	44 Psionic	44 Elephant or Rhino

ADDITIONAL BACKGROUNDS

A simple list of backgrounds for PCs or NPCs. If you use this list for players, let them roll for some equipment or make a gear pack you think fits.

1. Spy	9. Syndicate	17. Military	25. Pirate
2. Dock Worker	10. Politician	18. Entertainer	26. Trader
3. Ship Hand	11. Bounty Hunter	19. Professor	27. Explorer
4. Mercenary	12. Fugitive	20. Scavenger	28. Cultist
5. Nomad	13. Farmer	21. Engineer	29. Law Enforcer
6. Gambler	14. Smuggler	22. Mystic	30. Corporate
7. Merchant	15. Nobility	23. Scientist	
8. Pilot	16. Street Rat	24. Tribesperson	

D44 Mutations

11	Gills (water breathing)
12	Claws or Horns (D6 Unarmed)
13	Fur (cold resist)
14	Skin Color Shift (roll D8) 1. Red, 2. Silver, 3. Gold, 4. Green, 5. Blue, 6. Violet, 7. Iridescent Black, 8. Patterned (re-roll 2 & mix)
21	Wings (D4) 1. Feathered, 2. Insect, 3. Leathery, 4. Spectral
22	Blood Craving (Once a day, heal 1D4 STR when you feed)
23	Devil Jaw (D6 damage) Sharp iron teeth and powerful crushing jaw that can unhinge.
24	Prehensile Tail (roll D4) 1-2. Reptilian, 3-4. Monkey
31	Scales or Mineral Growths (+1 armor)
32	Agility (double all speeds)
33	Perfect Memory (+1 WIL)
34	Evolved Mind (roll psionic power)
41	Gray Eel Skin (D6 Shock, Touch)
42	Molt (Can permanently change appearance once a month)
43	Dense Bones (+2 STR, -1 DEX)
44	Regenerative (heal 1D4 STR once a day)

D8 Drugs

Addiction: Must take addicted substance daily or be deprived. New WIL save each day to shake off addiction. After 3 failed saves, take the “Drugs” vice.

1	Cloud Nine	Disposable vaporizer cartridge. Induces powerful euphoria. WIL save vs blissful detachment for 2d6 hours.
2	R.A.G.E.	Crystallized sugar tablet laced with hallucinogenics. STR save vs flying into a violent frenzy for an hour. Unarmed attacks do D8 damage.
3	Jet Fuel	White powder. Snort it to gain a burst of energy. STR save vs deprived for 2d12 hours.
4	Bliss	Little blue pill. Consume to restore 1D4 fatigue, WIL save vs addiction.
5	Slimeball	A tacky, chewable compound. Mild buzz and turns your eyes bright green for an hour.
6	T-33B	Synthesized lab-grown molecules in the form of an arm patch. For 1D4 hours you have +3 armor. When the effects wear off you gain +1 fatigue and are violently ill for 1D6 hours. Popular with militias and pirates.
7	Shoosh	Deep violet leaf-like moss that is dried and rolled in paper or used in communal tube-pipes for smoking. Has a casual, mood-boosting & relaxing effect. Non-addictive.
8	Brain Drain	Alcoholic liquid with microbial alien spores. Intoxicating and powerfully stimulating to the mind and senses.
